*Early American Cartographies* Martin Brückner, 2011 Drawing from both current historical interpretations and new interdisciplinary perspectives this collection provides diverse approaches to understanding the multilayered exchanges that went into creating cartographic knowledge in and about the Americas In the introduction editor Martin Brückner provides a critical assessment of the concept of cartography and of the historiography of maps The individual essays then range widely over space and place from the imperial reach of Iberian and British cartography to indigenous conceptualizations including dirty ephemeral maps and star charts to demonstrate that pre nineteenth century American cartography was at once a multiform and multicultural affair The essays also bring to light original archives and innovative methodologies for investigating spatial relations among peoples in the Western Hemisphere from the publisher Catalogue of Books, Maps, Plates on America, and of a Remarkable Collection of Early Voyages Frederik Muller & Cie, 1872 Monthly Catalog of United States Government Publications United States.
