Conflict and Controversy in the Confederate High Command Dennis B.

Conklin,2025-05-30 The Atlanta Campaign of 1864 played a pivotal role in shaping the outcome of the American Civil War and bolstering Abraham Lincoln s reelection in November securing the path to eventual Union victory Long overshadowed this Georgia campaign has experienced a resurgence of interest over the past decade Dennis B Conklin contributes to this growing body of scholarship with Conflict and Controversy in the Confederate High Command Davis Johnston Hood and the Atlanta Campaign of 1864 Conklin s account originally a Ph D dissertation examines the dysfunctional relationships that plagued the Confederate high command contributing to the defeat of the Army of Tennessee and the loss of Atlanta a vital logistical rail hub He highlights critical flaws in Jefferson Davis s leadership and the deep mutual distrust between the Confederate president and Joseph E Johnston commander of the Army of Tennessee which led them to work at cross purposes As the campaign slowly unfolded and William T Sherman s advancing armies claimed vast swaths of territory tensions escalated among Davis Johnston corps commander John Bell Hood and Georgia Governor Joseph Brown further compounding the Confederacy s strategic woes Davis s initial unease with Johnston s leadership partly explains why he promoted Hood to command an infantry corps in the principal Western army before the campaign began Hood who had

honed his skills as a tactical commander under the aggressive Robert E Lee in the Army of Northern Virginia grew increasingly exasperated by Johnston's repeated withdrawals. This tension Conklin argues culminated in their inevitable clash at Cassville, a pivotal dispute driven by inconsistent maps and divergent battlefield philosophies. The ensuing correspondence among key figures in Richmond further eroded Davis's confidence in Johnston, paving the way for Hood's eventual rise to command the Army of Tennessee. **Conflict and Controversy in the Confederate High Command** offers a compelling and briskly paced exploration of command politics, human nature, and the pressures of war, illuminating how these forces shaped the outcome of one of the Civil War's most consequential campaigns.

Civil War Newspaper Maps David C. Bosse, 1993. Bull Run, Ball's Bluff, Secessionville, Antietam, Champion's Hill, Chickamauga. To the Northern public during the Civil War, they were exotic names of unfamiliar places where husbands, sons, fathers, and brothers fought and died. Hungry for information from these far-off battlefields, Americans began buying daily newspapers in record numbers. Competition among publishers grew keen. Correspondents reporting from the field soon began supplementing written dispatches with battlefield maps, and before long newspapers were seeking new ways to portray topography and battle lines in clear, effective images. In **Civil War Newspaper Maps**, David Bosse shows how nineteenth-century advances in printing and engraving technology, coupled with an unprecedented public demand for information, led to the development of a means of mass communication still in use today: the quickly produced newspaper battlefield map. Bosse's introduction offers a concise overview of the subject, including how correspondents got maps to their papers, the field press, military relations during the war, and the economic problems of map printing. Following the text is an atlas of forty-five newspaper maps printed by the Northern daily press. Each map is accompanied by a summary of the military operation it illustrates and a commentary on the map itself, including an evaluation of its accuracy based on comparison with other historical and cartographic sources. Arranged chronologically, the maps cover nearly every theater of the war and represent a unique historical record of one of the pivotal events in American history.

Maps of War Jeremy Black, 2018-10-18. A magnificent visual survey of how conflict was recorded and planned using maps produced at the time to reveal how warfare and its documentation has changed through the centuries. There is little documented mapping of conflict prior to the Renaissance period, but from the 17th century onwards, military commanders and strategists began to document the wars in which they were involved and later to use mapping to actually plan the progress of a conflict. Using contemporary maps, this sumptuous new volume covers the history of the mapping of war on land and shows the way in which maps provide a guide to the history of war. Content includes: The beginnings of military mapping up to 1600, including the impact of printing and the introduction of gunpowder; The seventeenth century: The focus is on maps to illustrate war rather than as a planning tool, and the chapter considers the particular significance of maps of fortifications; The eighteenth century: The growing need for maps on a world scale reflects the spread of European power and of transoceanic conflict between Europeans. This chapter focuses in particular on the American War of Independence. The

nineteenth century Key developments included contouring and the creation of military surveying Subjects include the Napoleonic Wars and the American Civil War The twentieth century including extended features on the First and Second World Wars including maps showing trench warfare and aerial reconnaissance Much of the chapter focuses on the period from 1945 to the present day including special sections on the Vietnam War and the Gulf Wars *Some Notable Surveyors & Map-makers of the Sixteenth, Seventeenth, & Eighteenth Centuries and Their Work* Sir Herbert George Fordham,1929
