They are among the world's great pioneers and adventurers the mapmakers who for centuries have been expanding our knowledge of who and where we are and where we want to go. From the surprisingly accurate silk maps prepared by Chinese cartographers in the second century B.C. to medieval mapmakers who believed they had fixed the location of paradise through to the expeditions of Columbus and Magellan John Noble Wilford chronicles the exploits of the great pioneers of mapmaking. Wilford brings the story up to the present day as he shows the impact of new technologies that make it possible for cartographers to go where no one has been before from the deepest reaches of the universe where astronomers are mapping time as well as space to the inside of the human brain. These modern day mapmakers join the many earlier adventurers including ancient Greek stargazers Renaissance seafarers and the explorers who mapped the American West whose achievements shape this dramatic story of human inventiveness and limitless curiosity. *International Index to Periodicals*, 1924 *Cosmography in the Age of Discovery and the Scientific Revolution* David Barrado Navascués, 2023-05-26 This book tells the comprehensive history of cosmography from the 15th Century Age of Discovery onward.
