Marco Polo Dominican Republic:

Dominican Republic Gesine Froes, 2000 Democracy and War David L. Rousseau, 2005-03-24 Conventional wisdom in international relations maintains that democracies are only peaceful when encountering other democracies Using a variety of social scientific methods of investigation ranging from statistical studies and laboratory experiments to case studies and computer simulations Rousseau challenges this conventional wisdom by demonstrating that democracies are less likely to initiate violence at early stages of a dispute Using multiple methods allows Rousseau to demonstrate that institutional constraints rather than peaceful norms of conflict resolution are responsible for inhibiting the quick resort to violence in democratic polities Rousseau finds that conflicts evolve through successive stages and that the constraining power of participatory institutions can vary across these stages Finally he demonstrates how constraint within states encourages the rise of clusters of democratic states that resemble zones of peace within the anarchic international structure **Shedding The Veil: Mapping The European Discovery Of America And The World** Thomas Suarez, 1994-04-29 Shedding the Veil is a highly original overview of Europe's exploration and discovery beyond her own confines It tackles the subject via an analysis of maps dating from circa 1434 to 1865 with an emphasis on the period before 1600 The book begins with an appraisal of the peculiar circumstances which led late medieval Europe to pursue long distance travel both overland and by sea introduces cosmographic traditions inherited from classical times and investigates pre Columbian excursions into the western ocean Finally the great voyages and mappaemundi of the early sixteenth century are described in depth After 1600 the focus begins to narrow North America and particularly to the colonization of the American Northeast All maps discussed in detail are illustrated 40 full page b w plates 25 full page color plates **Coast Lines** Mark Monmonier, 2008-09-15 In the next century sea levels are predicted to rise at unprecedented rates causing flooding around the world from the islands of Malaysia and the canals of Venice to the coasts of Florida and California These rising water levels pose serious challenges to all aspects of coastal existence chiefly economic residential and environmental as well as to the cartographic definition and mapping of coasts It is this facet of coastal life that Mark Monmonier tackles in Coast Lines Setting sail on a journey across shifting landscapes cartographic technology and climate change Monmonier reveals that coastlines are as much a set of ideas assumptions and societal beliefs as they are solid black lines on maps Whether for sailing charts or property maps Monmonier shows coastlines challenge mapmakers to capture on paper a highly irregular land water boundary perturbed by tides and storms and complicated by rocks wrecks and shoals Coast Lines is peppered with captivating anecdotes about the frustrating effort to expunge fictitious islands from nautical charts the tricky measurement of a coastline's length and the contentious notions of beachfront property and public access Combing maritime history and the history of technology Coast Lines charts the historical progression from offshore sketches to satellite images and explores the societal impact of coastal cartography on everything from global warming to homeland security Returning to the form of his celebrated Air Apparent

Monmonier ably renders the topic of coastal cartography accessible to both general readers and historians of science technology and maritime studies In the post Katrina era when the map of entire regions can be redrawn by a single natural event the issues he raises are more important than ever An Intellectual History of the Caribbean S.

Torres-Saillant,2006-01-08 This is first intellectual history of the Caribbean written by a top Caribbean studies scholar The book examines both the work of natives of the region as well as texts interpretive of the region produced by Western authors Stressing the experimental and cultural particularity of the Caribbean the study considers major questions in the field

Effortless and compelling Brooks is a wonderful storyteller I doubt I will read a better book this year Sunday Telegraph Each of Vermeer s paintings tells a story In one a military officer leans toward a laughing girl in another a woman stands by a window and weighs silver in a third fruit spills from a porcelain bowl onto a lavish Turkish carpet Hiding in plain sight these details hint at the intricate threads that bound Vermeer s world together the officer s hat is made from North American beaver bought with silver extracted from the mines of Peru while beaver pelts were traded in their thousands for the Chinese porcelain so beloved by the Dutch in the Golden Age From a view of Delft Vermeer gives us the world As a new Vermeer exhibition opens at the Rijksmuseum the largest of its kind in history Vermeer s Hat offers a fascinating perspective on how the burgeoning forces of trade and commerce shaped Vermeer s masterpieces **The Jesuit Pierre-François-Xavier de Charlevoix's (1682-1761) Journal of a Voyage in North America** Micah True,2019-09-16 The French Jesuit Pierre Francois Xavier de Charlevoix s 1744 journal of his voyage through French North America New France Louisiana and the Caribbean is among the richest eighteenth century accounts of the continent s colonization as well as its indigenous

inhabitants flora and fauna Micah True s new translation of this influential text is the first to appear since 1763 It provides the first complete and reliable English version of Charlevoix s journal and reveals the famous Jesuit to have been a better literary stylist than has often been assumed on the basis of earlier translations Complemented by a detailed introduction and richly annotated this volume finally makes accessible to an Anglophone audience one of the key texts of eighteenth century French America

The Age of Ecology Joachim Radkau,2014-04-03 This book is the first major study of the history of environmentalism from its origins in romanticism and the nature cults of the late 18th century to the global environmental movements of today Radkau shows that this is not a single story of the steady ascent of environmentalism but rather a multiplicity of stories each with its own dramatic tension between single issue movements and the challenges posed by the

interconnection of environmental issues between charismatic leaders and bureaucratic organizations and between grassroots movements and global players While the history can be traced back several centuries environmentalism has flourished since the environmental revolution of 1970 spurred on by the Chernobyl nuclear disaster in 1986 and the growing concern about global warming While environmentalists often opposed the scientific mainstream they were also often led by scientific knowledge Environmentalism is the true Enlightenment of our time so much so that we can call our era the age of ecology This timely and comprehensive global history of environmentalism will be essential reading for anyone concerned with the most pressing global issues of our time

Introduction to Global Military History Jeremy Black, 2014-06-03 This lucid account of military developments around the modern world begins with the American War of Independence and the French revolutionary wars and continues chronologically to the latest 21st century conflicts It combines determinedly global coverage with thought provoking analysis not only of the military aspects of conflict but also its social cultural political and economic dimensions and consequences By placing familiar events alongside the largely unknown the reader is forced to reassess the standard grand narrative of military history that rests on assumptions of Western cultural and technological superiority It will be essential reading for students worldwide whether studying modern military history modern world history history and international relations or war and society This fully updated second edition includes chapter introductions and conclusions to assist study and revision Voices of War sourced extracts from the field of conflict case studies in each chapter to support the narrative and provoke discussion a 12 page colour map section and over 20 other integrated maps annotated references from the latest publications in the field

The World Wars - 1871-1945 Ruben Ygua, 2025-08-20 Traditional methods of studying the past have always given greater importance to nationalist religious and moral interests which subordinated the historical fact to the System point of view That s how we have been educated The time has come to simplify and show respect for our ancestors striving to know what really happened in the past and not just what they want to inform us about After so many years of studying History I came to the conclusion that the best study system is through an impartial objective Chronology that just put each event in its exact place in time revealing History without manipulation This Chronology contains not only purely political facts such as the

foundation of cities the birth of kingdoms and empires scientific and geographical discoveries natural disasters and epidemics it also includes information on the most different fields of human activity chemistry astronomy geography mathematics and so on In parallel the chronology is complemented by data that do not belong to a specific date but to an entire epoch they are each society generalities curiosities customs the religion of each civilization inventions or discoveries that cannot be placed in an exact date etc The result of all this set is one of the most complete chronologies within its reach periodically updated with the latest archaeological and scientific discoveries and that transforms the reader into an eyewitness of the past understanding the relation of geographically distant facts to each other but closely connected in time and influencing unexpected consequences This is something that traditional history has generally ignored when it was not usable A work of this magnitude could not be published in a single book so I have divided it into several collections and the Spanish originals are being translated into French English Italian and Portuguese The chronology goes from prehistory to the present day year by year as far as possible For those who prefer a deeper and more detailed study I have prepared a second chronology day by day which for now covers from 1789 to 1946 divided into five collections Dominican Republic ,2000
