*Creation Myths* Marie-Louise von Franz, 2001-05-01 A leading Jungian scholar analyzes common motifs in creation myths from cultures around the world explaining how they inform the collective unconscious and contribute to our ability to create as human beings Parabola Creation myths are the deepest and most important of all myths because they are concerned with both the basic patterns of existence and the ultimate meaning of life In this book an eminent Jungian analyst examines the recurring motifs that appear in creation myths from around the world and shows what they teach us about the mysteries of creativity the cycles of renewal in human life and the birth of consciousness in the individual psyche Among the topics discussed are Why the creative process is often accompanied by anxiety depression loneliness and fear of the unknown The meaning of creation motifs such as the egg the seed the primordial being the creative fire the separation of heaven and earth and the four stages of creation Creation symbolism in the alchemical opus of medieval tradition How creation myth motifs appear in the dreams of people who are on the verge of a leap forward in consciousness

around the world Also featured are clear presentations of the theories of towering figures such as Freud Jung Frazer Campbell and Malinowski who have proposed variously that myths are primitive history based on literal fact a means of expressing profound tribal wisdom and psychological and sexual truth or that they represent a search for kinship with the animal and vegetable world Fascinating and erudite this revered book ranks among the select handful of core texts in any mythology collection     Alpha Charles H. Evans,2013-11-19 Did the universe start with a bang or has it existed always Was there a supernatural being behind it all or just mindless forces The beginning of things has forever tested the limits of curiosity and such questions have both challenged atheists and inspired believers Ancient cultures resorted to myth and symbolism to tell vibrant stories about human origins Later civilizations added philosophical and scientific explanations but these are not definitive The nature and meaning of existence the why as much as the how questions are in the end mysterious

In this lively and wide ranging book G R Evans explores the world s myriad creation stories against the background of the biggest question there is what are we doing here Discussing Swahili legends that resemble the Book of Genesis Greek tales about the Titans Native American Inca and Mesopotamian mythologies and Vedic creation cycles that begin with a cosmic egg or seed the author surveys polytheist monotheist and dualist ideas about supernatural power Tracing the history of humanity as it has struggled over many millennia to make sense of itself The Creation Myth will attract students of religion history and philosophy and general readers alike
