Pardalos, H. Edwin Romeijn, 2006-02-28 This work brings together some of the most up to date research in the application of operations research and mathematical modeling techniques to problems arising in supply chain management and e Commerce While research in the broad area of supply chain management encompasses a wide range of topics and methodologies we believe this book provides a good snapshot of current quantitative modeling approaches issues and trends within the field Each chapter is a self contained study of a timely and relevant research problem in supply chain management The individual works place a heavy emphasis on the application of modeling techniques to real world management problems In many instances the actual results from applying these

techniques in practice are highlighted In addition each chapter provides important managerial insights that apply to general supply chain management practice The book is divided into three parts The first part contains chapters that address the new and rapidly growing role of the internet and e Commerce in supply chain management Topics include e Business applications and potentials customer service issues in the presence of multiple sales channels varying from purely Internet based to traditional physical outlets and risk management issues in e Business in B2B markets *Designing and Managing the Supply Chain* David Simchi-Levi, Philip Kaminsky, Edith Simchi-Levi, 2003 Introduction to Supply Chain Management Logistics Network Configuration Inventory Management and Risk Pooling The Value of Information Supply chain integration Strategic Alliances Procurement and outsourcing strategies International Issues in Supply Chain Management Coordinated Product and Supply Chain Design Customer Value and Supply Chain Management Information technology for supply chain management Decision support systems for supply chain management *Doing What Matters* James M. Kilts, Robert L. Lorber, John F. Manfredi, 2010-01-05 When Warren Buffett was asked why the Gillette board of directors chose Jim Kilts to be CEO he said Jim made as much sense in terms of talking about business as anybody I've ever talked to If you listen to Jim analyze a business situation you get absolutely no baloney And frankly finding someone like that is a rarity There is only one CEO in recent times who has faced and succeeded at the extraordinary challenges of leading three major companies Gillette Nabisco and Kraft into prosperous futures by doing what matters on the fundamentals That CEO is Jim Kilts In this vivid first person account he reveals his system for success that is both cutting edge and back to basics Doing What Matters the action plan for identifying and tackling what's important and ignoring the rest is the key to winning in a warp speed world where the need for revolutionary speed and decisiveness increases by the day Kilts illustrates his ideas with colorful stories such as that little red razor A new product idea he proposed early on at Gillette it was initially shelved because everyone knew you couldn't sell a red razor but went on to become one of Gillette's biggest marketing successes ever Jim Kilts's focus on both business fundamentals and personal attributes provides the complete package showing how to get results that make a difference through Intellectual integrity The ability to face the unvarnished truth about yourself and your business and using what you see as the basis for action Generating emotional engagement and enthusiasm Using the force of your personality and ideas to infuse people and an entire organization with a sense of purpose and mission Action Gillette with just five product lines had over 20 000 SKUs After studying the issue for over two years there were still 20 000 How Kilts got Gillette off the dime to pare down the number to 7 000 almost overnight is an astonishing example of getting the rubber to meet the road with enormous benefits to the business Understanding the right things through an overarching concept to frame and filter issues For Jim Kilts it was Total Brand Value the framework he used in the consumer products industry for achieving better faster and more complete results than the competition Whether you're CEO of a multibillion dollar global company the brand manager for a product an entrepreneur starting a small business or just beginning a career Doing What Matters

provides the practical ideas that get results ranging from a day one action plan for starting a new job to a chorus of cheers and support to a program of total innovation that involves everyone in changes from small to big bang The End of the Row Carmel C.
