Bound in Twine Sterling D. Evans, 2013-01-14 Before the invention of the combine the binder was an essential harvesting implement that cut grain and bound the stalks in bundles tied with twine that could then be hand gathered into shocks for threshing Hundreds of thousands of farmers across the United States and Canada relied on binders and the twine required for the machine's operation Implement manufacturers discovered that the best binder twine was made from henequen and sisal spiny fibrous plants native to the Yucatán Peninsula of Mexico The double dependency that subsequently developed between Mexico and the Great Plains of the United States and Canada affected the agriculture ecology and economy of all three nations in ways that have historically been little understood These interlocking dependencies identified by author Sterling Evans as the henequen wheat complex initiated or furthered major ecological social and political changes in each of these agricultural regions Drawing on extensive archival work as well as the existing secondary literature Evans has woven an intricate story that will change our understanding of the complex transnational history of the North American continent

Neoliberalism and Commodity Production in Mexico Thomas Weaver, James B. Greenberg, William L. Alexander, Anne Browning-Aiken, 2012-06-15 Neoliberalism and Commodity Production in Mexico details the impact of neoliberal practice on the production and exchange of basic resources in working class communities in

Mexico Using anthropological investigations and a market driven approach contributors explain how uneven policies have undermined constitutional protections and working class interests since the Mexican Revolution of 1910 Detailed ethnographic fieldwork shows how foreign investment privatization deregulation and elimination of welfare benefits have devastated national industries and natural resources and threatened agriculture driving the campesinos and working class deeper into poverty Focusing on specific commodity chains and the changes to production and marketing under neoliberalism the contributors highlight the detrimental impacts of policies by telling the stories of those most affected by these changes They detail the complex interplay of local and global forces from the politically mediated systems of demand found at the local level to the increasingly powerful municipal and state governments and the global trade and banking institutions Sharing a common theoretical perspective and method throughout the chapters Neoliberalism and Commodity Production in Mexico is a multi sited ethnography that makes a significant contribution to studies of neoliberal ideology in practice

North American Integration Gaspare M. Genna, David A. Mayer-Foulkes, 2013-07-18 The course of events since the implementation of NAFTA has had unexpected elements with significant impacts on North American integration First has been the rise of China as a larger source of imports and production partner than Mexico Second has been the rise of security concerns since September 11 2001 The result has been much stronger integration

between Canada and the US than with Mexico Migration issues are now linked with security which has risen to a top priority in the international agenda While liberalization has furnished strong economic incentives for integration it has not provided a sufficient guide for the political process which requires leadership and appropriate institutions to coordinate and regulate the special interest groups A coherent and effective North American integration would be a valuable asset in the context of global integration and competition yet the issues involved are quite complex and varied North American Integration An Institutional Void in Migration Security and Development examines the current state of North American integration Editors Gaspare M Genna and David A Mayer Foulkes gather an international group of experts to give a broad coherent picture of the current multifaceted process of integration and find that institutional development is an essential component Divided into three sections the book Discuss the determinants of integration and shows that the institutional characteristics of the three countries including democracy and basic rights are the most important Provides examples of institutional building in contexts for which institutions are lacking specifically labor migration and health issues Examines issues such as overall security arrangements trade drug related violence energy and the continuing wage gap among the countries which have an important bearing on integration

The Political Economy of Space in the Americas Alejandra Roncallo, 2013-07-31 This book presents a novel and cutting edge interpretation of the evolving political economy of the Americas Through a combination of qualitative research and theory it considers the reconstruction of American led hegemony in the Americas since the 1982 debt crisis and presents an examination of the new Pax Americana Drawing on the Gramscian concept of hegemony as understood by Robert Cox and Henri Lefebvre this book argues that since the 1982 debt crisis there has been a reconstruction of American led hegemony under the signature of neo liberalism and that it has taken place in the last four ten year developmental planning stages market reforms in the 1980s good governance in the 1990s poverty reduction in the new millennium and currently the disembedding of security Each evolutionary stage was constructed to secure the continuing motion of capitalist accumulation on a world scale Moving from the global to the local scale the book includes two detailed case studies on mining extraction in Bolivia to show how subaltern groups actually experienced and negotiated the transition from the old to the new Pax Americanas at the level of everyday life and what conflicts arose The book ends with a chapter on President Evo Morales and the re foundation of Bolivia as an indigenous nation The Political Economy of Space in the Americas will be of interest to students and scholars of political economy and Latin American politics

Latin America in the 21st Century Gian Luca Gardini, 2012-04-12 Twenty first century Latin America is rich in history culture and political and social experimentation In this fascinating and insightful analysis Gardini looks at contemporary developments at three

interconnected levels state region and globe At the state level leaders such as Evo Morales of Bolivia and Chavez of Venezuela embody a renewed intellectual autonomy in the continent while revealing significant discrepancies between their rhetoric and their actions At the regional level while a consensus has emerged over Latin American unity as the only way towards development the existence of several competing schemes of regional economic and political integration more accurately reflect the diversity of the area At the global level elements of change such as the rise of Brazil and the involvement of China as a new trade partner sit alongside traits of continuity such as the crucial political economic and ideational role played by Washington Overall Gardini argues that despite the numerous challenges to be faced Latin America is now more wealthy autonomous and better placed in global geopolitics than at any time in its recent history *The History of American Foreign Policy from 1895* Jerald A Combs, 2015-02-12 This important text offers a clear concise and affordable narrative and analytical history of American foreign policy since the Spanish American War The book narrates events and policies but goes further to emphasize the international setting and constraints within which American policy makers had to operate the domestic pressures on those policy makers and the ideologies preferences and personal idiosyncrasies of the leaders themselves

North American Homeland Security Imtiaz Hussain, Satya R. Pattanayak, Anil Hira, 2008-10-30 Did 9 11 revive a North American guns butter trade off Established in the largest administrative overhaul since World War II the Department of Homeland Security was charged with keeping the United States safe within a wider security community but confronted the Washington Consensus based Western Hemisphere free trade movement beginning with the North American Free Trade Agreement NAFTA and extending to the Central American Free Trade Agreement CAFTA in 2003 to materialize a Free Trade Area of the Americas FTAA compact Whether 9 11 restrictions impeded these trade related thrusts or not embracing neoliberalism permitted Canada and Mexico to pursue their own initiatives such as proposing free trade to the US Canada in 1985 Mexico in 1990 but as during the Cold War security imperatives ultimately prevailed This work investigates Canada's and Mexico's Department of Homeland Security responses through three bilateral studies of policy responses along comparative lines case studies of security and intelligence apparatuses in each of the three countries and a post 9 11 trilateral assessment Ultimately they raise a broader and more critical North American question Will regional economic integration continue to be trumped by security considerations as during the Cold War era and thereby elevate second best outcomes or rise above the constraints to reassert the unquenchable post Cold War thirst for unfettered markets replete with private enterprises liberal policies and full fledged competitiveness *Enfoque*, 2002

Limits to Regional Integration Søren Dosenrode, 2016-03-09 Regionalization in general and regional integration in particular have taken place at a growing pace since the end of the Cold War when states were set free from various security overlays Regional integration is logical as it is supposed to advance wealth and peace Still the picture is far from clear and the process of regional integration is not automatic disintegration takes place as we saw in the cases of the Soviet Union Yugoslavia and Czechoslovakia to mention a

few This is the case not only in states recently brought together but also in traditional states like Britain The Netherlands and Spain where strong groups strive for independence In some places regionalization is flourishing but regional integration is not Some regional integration projects like the North American Free Trade Agreement and Mercosur seem to stagnate Certainly there are limits to regional integration This comprehensive volume written by high profiled academics covers these themes by examining eleven cases ranging from the lack of integration in the Arctic and the Middle East to ongoing or progressing integration in Europe to uncover what blocks regional integration the results of which are used for developing new theoretical insights
