Nafta Tax Law And Policy Resolving The Clash Between Economic And Sovereignty Interests:

Taxation of Hybrid Financial Instruments and the Remuneration Derived Therefrom in an International and Cross-border Context Sven-Eric Bärsch, 2012-12-13 Despite the enormous diversity and complexity of financial instruments the current taxation of hybrid financial instruments and the remuneration derived therefrom are characterized by a neat division into dividend generating equity and interest generating debt as well as by a coexistence of source and residence based taxation This book provides a comparative analysis of the classification of hybrid financial instruments in the national tax rules currently applied by Australia Germany Italy and the Netherlands as well as in the relevant tax treaties and EU Directives Moreover based on selected hybrid financial instruments mismatches in these tax classifications which lead to tax planning opportunities and risks and thus are in conflict with the single tax principle are identified To address these issues the author provides reform options that are in line with the dichotomous debt equity framework as he she suggests the coordination of either tax classifications or tax treatments NAFTA Tax Law and Policy Arthur J. Cockfield, 2005 *Green Taxation in East Asia* Richard Cullen, Jefferson Vanderwolk, Yan Xu, 2011 The broad sweep of green taxation pollution carbon resource and land taxes and tax incentives for environmental goals makes it complex to analyse Green Taxation in East Asia is a timely and valuable comparative contribution to an expanding literature Its scholarly country studies show how green taxes aim to modify behaviour correct externalities regulate or raise revenue As environmental policy and tax policy move closer together green taxes become feasible but are always as the editors say shaped by local political economic and social circumstances Miranda Stewart University of Melbourne Australia In today s world environmental challenges grow apace and the impact of taxation measures on these will prove critical Green Taxation in East Asia addresses those challenges It draws on world wide experiences including those from North America and the EU by analysing and critiquing how green taxation can inform develop and implement environmental policies in East Asia and beyond This is not a sterile tax debate The authors of this work all leading scholars in their respective jurisdictions combine economic social and local political perspectives on what should work and what should not The debate is too important to ignore in a world where Kyoto seems a long way from Washington the fragrant harbour is no longer and even in the lands down under long white clouds and pristine beaches are no longer taken for granted Taxation is not a panacea for curing environmental ills but it is as this book admirably shows part of the answer Andrew Halkyard University of Hong Kong The right of East Asia to grow its economy and provide its citizens with living standards enjoyed elsewhere is as undeniable as the risk to the global environment from this growth A volume that contrasts current initiatives in China and Hong Kong to reduce that risk with lessons from international experience presented by leading international experts from four continents is more than just timely it can make a key contribution to the development of contemporary thinking on taxation and the environment This work fits the bill perfectly Rick Krever Monash University Australia The authors of the jurisdictional chapters in this book are of necessity

more focussed on analyzing the interaction today between taxation and related fiscal measures and the environment From these studies it is clear that a great deal is amiss in the way this interface works at present across all the jurisdictions under review But this research also shows positive steps being taken and great scope for further positive tax policy development We can see from this research how smart policy innovation can start right now and also how it can build better foundations for the introduction of more comprehensive globally effective policy frameworks such as those advanced by Hansen and Sandor Time is of the essence The scholarship in this volume shows that lawyers and tax experts are engaged in finding solutions Can green taxation make a difference The answer is a resounding yes From the foreword by Christine Loh The core concern of this book is the potential use of taxation and related measures to foster climate helpful large scale change within East Asia The contributing authors examine key issues such as how Greater China for instance confronts severe environmental problems which are a direct product of several decades of remarkable economic growth The detailed analysis in this book identifies a range of green taxation guidelines for East Asia as it seeks to drive down striking levels of environmental degradation and tackle the climate change challenge Addressing an important need in the public policy debate this book will appeal to academics students government policymakers regulators and practitioners in environmental law taxation law and policy as well as comparative environmental law and comparative taxation law and policy Public policy commentators and journalists with an interest in the above areas will also find this book worthwhile and informative

Challenging Gender Inequality in Tax Policy Making Kim Brooks, Åsa Gunnarson, Lisa Philipps, Maria Wersig, 2011-05-16 This volume takes a critical look at the gender of tax policy around the world Contributors based in eight different countries examine the profound effects that gender norms and practices have had in shaping tax law and policy and how taxation in turn impacts upon the possibilities for equality along gender race class sexuality and other lines Chapters explore how the gendered fiscal state might be theorised how structural choices about rates and bases in tax policy design contribute to gender inequality how tax policy affects family configurations and perceptions of what constitutes family how fiscal systems impact on savings and wealth accumulation by women and men and the role of different policy making processes and institutions in occluding and sometimes challenging these patterns Most significantly perhaps the book explores these questions in an international frame traversing countries and continents The conclusion fiscal policy has deep rooted long standing gender implications that affect virtually every aspect of our social political and economic lives whether we live in Canada Australia or Kenya

The Interface of International Trade Law and Taxation Jennifer E. Farrell, 2013 This book explores the ill defined and oft underestimated relationship between the World Trade Organization WTO and taxation By adopting a two pronged approach the relationship is examined in terms of the extent to which the WTO legal framework exerts influence upon domestic tax law and international tax policy and whether it is appropriate for the WTO to play a regulatory role in the field of taxation The book begins with an examination of the historical development of

international trade law and international tax law and demonstrates that these two separate areas of law are closely linked in terms of their underlying principles and historical evolution The work then goes on to offer a doctrinal analysis of the tax content found in the WTO legal texts and highlights ambiguities therein International Tax Evasion in the Global Information Age David S. Kerzner, David W. Chodikoff, 2016-11-21 This book provides a comprehensive analysis of the Organisation for Economic Cooperation and Development's OECD war on offshore tax evasion The authors explain the new emerging regulatory regimes on the global exchange of information to combat offshore tax evasion and analyse why Automatic Exchange of Information AEOI is not a magic bullet solution Chapters include coverage of the Foreign Account Tax Compliance Act FATCA AEOI and the Common Reporting Standards CRS and the unprecedented extra territorial enforcement by the United States of its tax and reporting laws including the FBAR provisions of the Bank Secrecy Act These new legal regimes directly impact nearly all financial institutions and financial service providers in the U S U K EU Canada and each of the 132 member jurisdictions of the OECD's Global Forum as well as 8 million U S expats In light of The Panama Papers this book offers a timely and valuable contribution on the prevalence and costs of international tax evasion for the global financial community policy makers and practitioners alike *Improving International Investment Agreements* Armand De Mestral, Armand L. C. De Mestral, Céline Lévesque, 2013 This book presents the reflections of a group of researchers interested in assessing whether the law governing the promotion and protection of foreign investment reflects sound public policy Whether it is the lack of checks and balances on investor rights or more broadly the lack of balance between public rights and private interests the time is ripe for an in depth discussions of current challenges facing the international investment law regime Through a survey of the evolution in IIA treaty making and an evaluation from different perspectives the authors take stock of developments in international investment law and analyze potential solutions to some of the criticisms that plague IIAs The book takes a multidisciplinary approach to the subject with expert analysis from legal political and economic scholars The first part of the book traces the evolution of IIA treaty making whilst the other three parts are organised around the concepts of efficiency legitimacy and sustainability Each contributor analyzes one or more issues related to substance treaty negotiation or dispute resolution with the ultimate aim of improving IIA treaty making in these respects *Improving International Investment Agreements* will be of particular interest to students and academics in the fields of International Investment Law International Trade Law Business and Economics **Toward a North American Legal System** J.
