Dinners Whole Foods Williams Sonoma Wine Business **The North American Idea** Robert A. Pastor, 2011-07-21 In its first seven years the North American Free Trade Agreement NAFTA tripled trade and quintupled foreign investment among the U S Mexico and Canada increasing its share of the world economy In 2001 however North America peaked Trade slowed among the three manufacturing jobs shrunk and illegal migration and drug related violence soared Europe caught up and China leaped ahead In *The North American Idea* eminent scholar and policy maker Robert A Pastor explains that NAFTA's mandate was too limited to address the new North American agenda Instead of offering bold initiatives like a customs union to expand trade the three leaders thought small Interest groups stalemated the small ideas as they inhibited the bolder proposals and the governments accomplished almost nothing To overcome this resistance and re invigorate the continent the leaders need to start with an idea based on a principle of interdependence If one country fails all three are harmed and if one grows they all benefit Drawing on first hand experience as a policy maker and analyst Pastor shows how this idea once woven into the national consciousness of the three countries could mobilize public support for continental solutions to problems that have confounded each nation working on its own To stimulate trade and reduce illegal migration for example the three countries could set up a fund to invest in the continent's infrastructure Such a fund would be impossible without leadership and an idea of the continent's current importance and its future promise Providing essential historical context and challenging readers to view the continent in a new way Robert Pastor offers an expansive vision and a detailed blueprint for a more integrated dynamic and equitable North America

Bound in Twine Sterling D. Evans, 2013-01-14 Before the invention of the combine the binder was an essential harvesting implement that cut grain and bound the stalks in bundles tied with twine that could then be hand gathered into shocks for threshing Hundreds of thousands of farmers across the United States and Canada relied on binders and the twine required for the machine's operation Implement manufacturers discovered that the best binder twine was made from henequen and sisal spiny fibrous plants native to the Yucatán Peninsula of Mexico The double dependency that subsequently developed between Mexico and the Great Plains of the United States and Canada affected the agriculture ecology and economy of all three nations in ways that have historically been little understood These interlocking dependencies identified by author Sterling Evans as the henequen wheat complex initiated or furthered major ecological social and political changes in each of these agricultural regions Drawing on extensive archival work as well as the existing secondary literature Evans has woven an intricate story that will change our understanding of the complex transnational history of the North American continent
