Evangelical Dictionary of World Religions H. Wayne House, 2019-02-19 With all of the different religions sects denominations and belief systems out there it can be difficult to separate the facts from mere opinion especially if one is relying solely on online sources which may or may not be vetted and which often have an ideological or political slant to them How can we truly understand if we cannot even be sure we are getting the facts straight In this comprehensive resource more than 75 evangelical scholars offer a thoroughly researched guide to Christianity other world religions and alternative religious views including entries on movements theological terms and major historical figures Perfect for pastors students and anyone who wants ready access to information on today's religious landscape *Nagarjuna's Madhyamaka* Jan Westerhoff, 2009-02-23

The Indian philosopher Acharya Nagarjuna c 150 250 CE was the founder of the Madhyamaka Middle Path school of Mahayana Buddhism and arguably the most influential Buddhist thinker after Buddha himself Indeed in the Tibetan and East Asian traditions Nagarjuna is often referred to as the second Buddha His primary contribution to Buddhist thought lies in the further development of the concept of sunyata or emptiness For Nagarjuna all phenomena are without any svabhava literally own nature or self nature and thus without any underlying essence In this book Jan Westerhoff offers a systematic account of Nagarjuna's philosophical position He reads Nagarjuna in his own philosophical context but he does not hesitate to show that the issues of Indian and Tibetan Buddhist philosophy have at least family resemblances to issues in European philosophy *Orientalism and Identity in Latin America* Erik Camayd-Freixas, 2013-03-14 Building on the pioneering work of Edward Said in fresh and useful ways contributors to this volume consider both historical contacts and literary influences in the formation of Latin American constructs of the Orient and the Self from colonial times to the present In the process they unveil wide ranging manifestations of Orientalism Contributors scrutinize the other great encounter not with Europeans but

with Arabic Chinese and Japanese cultures as they marked Latin American societies from Mexico Central America and the Caribbean to Peru Argentina and Brazil The perspectives experiences and theories presented in these examples offer a comprehensive framework for understanding wide ranging manifestations of Orientalism in Latin America and elsewhere in the developing world Orientalism and Identity in Latin America expands current theoretical frameworks juxtaposing historical biographical and literary depictions of Middle Eastern and Asian migrations both of people and cultural elements as they have been received perceived refashioned and integrated into Latin American discourses of identity and difference Underlying this intercultural dialogue is the hypothesis that the discourse of Orientalism and the process of Orientalization apply equally to Near Eastern and Far Eastern subjects as well as to immigrants regardless of provenance and indeed to any individual or group who might be construed as Other by a particular dominant culture

Language as Identity in Colonial India Papia Sengupta,2017-11-15 This book is a systematic narrative tracking the colonial language policies and acts responsible for the creation of a sense of self identity and culminating in the evolution of nationalistic fervor in colonial India British policy on language for administrative use and as a weapon to rule led to the parallel development of Indian vernaculars poets novelists writers and journalists produced great and fascinating work that conditioned and directed India s path to independence The book presents a theoretical proposition arguing that language as identity is a colonial construct in India and demonstrates this by tracing the events policies and

changes that led to the development and churning up of Indian national sentiments and attitudes It is a testimony of India's linguistic journey from a British colony to a modern state Demonstrating that language as basis of identity was a colonial construct in modern India the book asserts that any in depth understanding of identity and politics in contemporary India remains incomplete without looking at colonial policies on language and education from which the multiple discourses on self and belonging in modern India emanated **Identity, Ritual and State in Tibetan Buddhism** Martin A. Mills, 2013-11-05

This is a major anthropological study of contemporary Tibetan Buddhist monasticism and tantric ritual in the Ladakh region of North West India and of the role of tantric ritual in the formation and maintenance of traditional forms of state structure and political consciousness in Tibet Containing detailed descriptions and analyses of monastic ritual the work builds up a picture of Tibetan tantric traditions as they interact with more localised understandings of bodily identity and territorial cosmology to produce a substantial re interpretation of the place of monks as ritual performers and peripheral householders in Ladakh The work also examines the central and indispensable role of incarnate lamas such as the Dalai Lama in the religious life of Tibetan Buddhists Derrida and Indian Philosophy Harold Coward, 1990-10-09

This book establishes a constructive and mutually stimulating dialogue between Jacques Derrida and Eastern thought Surprising parallels are found with some traditional Indian philosophies of language especially with the Hindu philosopher Bhartrhari and with the Chinese Taoists Conversely the views of SAankara and Nagarjuna on language definitely differ from those of Derrida Derrida and Indian Philosophy builds a bridge by which traditional Eastern views on language can engage the latest in modern Western thought It also shows that our understanding of Derrida can be enhanced when his thought is approached from an Eastern perspective on language Logical Philosophy Avi Sion, 2013-11-26

Logical Philosophy A Compendium brings together five works by Avi Sion published in 2002 06 namely Phenomenology 2003 Volition and Allied Causal Concepts 2004 Meditations 2006 Ruminations 2005 and Buddhist Illogic 2002 These works together define what may be termed Logical Philosophy i e philosophical discourse distinguished by its steadfast reliance on inductive and deductive logic to resolve epistemological and ontological issues Metaphysics and Mystery Thomas Dean, 2019-07-15

Metaphysics and Mystery The Why Question East and West is a critical analysis comparison and evaluation of philosophical answers Western and Asian to the question Why is there something rather than nothing The question first posed by the 17th C philosopher Leibniz was reintroduced in the 20th C by Heidegger Volume One begins with an introduction that lays out the issues raised by the Why question It then analyzes contemporary Western philosophers who provide either cosmological metaphysical or existential ontological answers to the question It also considers transitional answers that bridge the two Volume Two examines Asian philosophers classical and contemporary who though rejecting the assumptions behind the question put forward nondualist answers that have a direct bearing on it It concludes with an argument for a revised understanding of the Why question that draws on the strengths and weaknesses of these Western and Asian philosophies and explores implications for ethics and religious thought Routledge
