**Face Reading** Ramesh Chandra Ramesh Chandra Shukla, 2020-09-01 What Your Face Says About You Most of us are familiar with using palm reading to determine fame fortune and future How about face Face reading also known as physiognomy is a science which predicts the future by reading the facial features of people Through face reading we can form an opinion about someone we meet for the first time Of great importance it is applicable to many occasions like blind date job interview making friends and business negotiation and can reasonably help prevent some wrong decisions The Face reveals it all 1 Your face tells about your Fate 2 Your face tells about your Career and the organs are Forehead Eyes Eyebrows Nose Mouth Ears Cheeks Chin Jaw and Philtrum central area between nose and upper lip Numerous illustrations given in the book depict the shapes and contours an organ such as forehead eyes nose mouth cheeks etc may take

*The Appearance of Character* Melissa Percival, 1999 Physiognomy the notion that there is a relationship between character and physical appearance is often dismissed as a marginal pseudoscience however *The Appearance of Character* argues that it is central to many disciplines and thought processes and that it constantly adapts itself to current patterns of thought and modes of discourse This interdisciplinary study determines the characteristics of physiognomical thought in France during the previously neglected period leading up to the reception of Johann Caspar Lavater's physiognomy in the early 1780s It establishes a corpus of physiognomical texts juxtaposing mainstream figures such as Buffon and Diderot with a host of minor writers It then considers the representation of the passions in art examining the

legacy of Charles LeBrun and revealing an aesthetics of facial representation where the passions are conceived in terms of multiplicity speed and nuance The contribution of the Comte de Caylus to the development of the *tête d'expression* is analysed as well as the innovations of Greuze in the field of expression Physiognomy in portraiture is also addressed through the work of La Tour Facial expression in painting is found to have strong parallels with contemporary acting theory and stage practice Finally The Appearance of Character addresses the notion of character outlining various predominant theories and analysing the complex relationship between character and passions In this respect the study has ramifications for theories of the self and individualism in the Enlightenment and beyond
