Naked Emperor International Political Sa:

The Naked Emperor Dirk Hermann,2007 Theory, Change and Southern Africa P. Vale,L. Swatuk,B.

Oden,2001-06-26 As dramatic changes unfold throughout the world and the new millennium begins many in South Africa have begun to ask what next The scale and pace of change have led to a feeling of powerlessness How to cope with globalization regionalization a depleting ozone layer new diseases rampant militarization let alone unseen structures of influence and oppression like race class and gender While there is no shortage of theoretical models on offer many feel that they are inadequate for the case of Southern Africa In this book scholars of both international relations and Southern Africa present a wide variety of thoughts on the future of the region and the place of theory in helping us to understand the bewildering array of events characterizing the late modern early twenty first century world This book marks a call to theory if Southern Africans are to overcome the divisive legacy of the past and to move toward a more prosperous and sustainable collective future theory must be placed at the centre of everyday life For it is our understanding of the world that shapes both it and us *Globalisation and Interdependence in the International Political Economy* R. J. Barry Jones,2013-11-07 Globalisation and Interdependence in the International Political Economy addresses central developments within the contemporary international system The notions of interdependence and globalisation that have accompanied the political discourse of a new world disorder are replete with definitional ambiguities theoretical difficulties and empirical complexities Barry Jones offers a critical review and analysis of these concepts their significance and place within the wider debates of international political economy He argues that contemporary conditions are complex with regionalising tendencies cross cutting those of increasing globalisation and national impulses surviving even in the face of powerful internationalising forces Future developments it is concluded may also be far more uncertain and turbulent than is widely anticipated Written by a leading authority this volume is an effective and compelling introduction to the complex study of international political economy **Locating BRICS in the Global Order** Rajan Kumar,Meeta Keswani Mehra,G. Venkat Raman,Meenakshi

Sundriyal,2022-10-14 BRICS is conceivably the most formidable organisation to have emerged in the post Cold War period in the non Western world This book highlights the significance of BRICS in a wider global context and foregrounds the long pending demand for the reform of global governance institutions The volume Traces how the organisation came into being and looks at the distinct norms and principles espoused by it Discusses the glaring limitations of the existing institutions of global governance Explores the economic growth and the rising political influence of BRICS states Analyses the internal threats to the survival of the organisation and assesses its prospects in the foreseeable future A significant intervention in situating BRICS as one of the major players in global governance the book will be of great interest to students and scholars of international political economy international business and finance international relations politics and Global South Studies

Africa and International Relations in the 21st Century S. Cornelissen,F. Cheru,T. Shaw,2016-01-26 This book

examines key emergent trends related to aspects of power sovereignty conflict peace development and changing social dynamics in the African context It challenges conventional IR precepts of authority politics and society which have proven to be so inadequate in explaining African processes Rather this edited collection analyses the significance of many of the uncharted dimensions of Africa s international relations such as the respatialisation of African societies through migration and the impacts this process has had on state power the various ways in which both formal and informal authority and economies are practised and the dynamics and impacts of new transnational social movements on African politics Finally attention is paid to Africa s place in a shifting global order and the implications for African international relations of the emergence of new world powers and or alliances This edition includes a new preface by the editors which brings the findings of the book up to date and analyses the changes that are likely to impact upon global governance and human development in policy and practice in Africa and the wider world post 2015

Constructing Global Enemies Eva Herschinger,2010-11-30
Examines efforts to counteract terrorism at the international level and drug prohibition policies

International Relations as Negotiation Brian R Urlacher,2015-12-03 Negotiations are central to the operation of the international system found at the heart of every conflict and every act of cooperation Negotiation is the primary vehicle that states use to manage conflict and build prosperity in a complicated and dangerous international system International Relations as Negotiation provides an overview of world politics that is both approachable and detailed It explores the factors that help or undermine efforts to negotiate solutions to international problems Key topics including international conflict and security the global economy international law and governance and environmental sustainability are explored in turn The history of the international system is traced through major treaty agreements and peace conferences and the future of the international system is projected The result is a survey of world politics that provides a seamless narrative about conflict and cooperation in the international system

Regional Leadership in Post-Soviet Eurasia Irina Busygina,Svetlana Krivokhizh,2023-05-22 This book explores power in international relations in a world characterized by the growing competition of major powers for smaller nations Focusing on the major powers and smaller countries of Eurasia it argues that power in international relations is different from coercion and is rather a social contract between a leader state and follower states where reciprocity is key and where leadership relationships cannot be adequately explained by focusing solely on the leader It challenges the perception that genuine regional leadership is quite common contending instead that it is rare that much more often major powers make claims for leadership and that regional leadership does not indicate the status of a particular state but rather the social role of the leader which is recognized by its followers a role which is always relative and based on communication and constant interaction with followers The book highlights the important role followers play in recognizing regional power the importance for a state s regional leadership strategy in creating and holding a valuable position attractive for followers and delivering greater value to followers compared to other potential leaders

The European Union and the BRICS Marek

Rewizorski,2015-06-10 This book explores the relations between the EU and the BRICS in the areas of politics economic development trade and security The contributions cover topics such as the position of the EU and BRICS in the global order and the EU as a normative power as well as the evolution characteristics and institutionalization of BRICS and the roles of its member countries Brazil Russia India China South Africa The book will appeal to researchers and scholars interested in the rise of BRICS and the resulting challenges and opportunities for the European Union and Global Governance **The Global Transformation** Barry Buzan,George Lawson,2015-02-05 The long nineteenth century 1776 1914 was a period of political economic military and cultural revolutions that re forged both domestic and international societies Neither existing international histories nor international relations texts sufficiently register the scale and impact of this global transformation yet it is the consequences of these multiple revolutions that provide the material and ideational foundations of modern international relations Global modernity reconstituted the mode of power that underpinned international order and opened a power gap between those who harnessed the revolutions of modernity and those who were denied access to them This gap dominated international relations for two centuries and is only now being closed By taking the global transformation as the starting point for international relations this book repositions the roots of the discipline and establishes a new way of both understanding and teaching the relationship between world history and international relations
