Baroque Modernity Joseph Cermatori, 2021-11-16 A groundbreaking study on the vital role of baroque theater in shaping modernist philosophy literature and performance Finalist for the Outstanding Book Award by the Association for Theatre in Higher Education Honorable Mention for the Balakian Prize by the International Comparative Literature Association Winner of the Helen Tartar Book Subvention Award by the American Comparative Literature Association Finalist of the MSA First Book Prize by the Modernist Studies Association Baroque style with its emphasis on ostentation adornment and spectacle might seem incompatible with the dominant forms of art since the Industrial Revolution but between 1875 and 1935 European and American modernists connected to the theater became fascinated with it In Baroque Modernity Joseph Cermatori argues that the memory of seventeenth century baroque stages helped produce new forms of theater space and experience around the turn of the twentieth century In response modern theater helped give rise to the development of the baroque as a modern philosophical idea. The book focuses on avant gardists whose writing takes place between theory and performance philosophical theater makers and theatrical philosophers including Friedrich Nietzsche St phane Mallarm Walter Benjamin and Gertrude Stein Moving between page and stage this study tracks the remnants of seventeenth century theater through modernist aesthetics across an array of otherwise disparate materials including modern opera Bertolt Brecht s Epic Theater poetic tragedies and miracle plays By reexamining the twentieth century s engagements with Gianlorenzo Bernini William Shakespeare Claudio Monteverdi Calder n de la Barca and other seventeenth century predecessors the book delineates an enduring tradition of baroque performance Along the way Cermatori expands our familiar narratives of the modern and traces a history of theatricality that reverberates into the twenty first century Baroque Modernity will appeal to readers in a wide array of disciplines including comparative literature theater and performance art and music history intellectual history and aesthetic theory Digital Baroque Timothy Murray, In this intellectually groundbreaking work Timothy Murray investigates a paradox embodied in the book s title What is the relationship between digital in the form of new media art and baroque a highly developed early modern philosophy of art Making an exquisite and unexpected connection between the old and the new Digital Baroque analyzes the philosophical paradigms that inform contemporary screen arts Examining a wide range of art forms Murray reflects on the rhetorical emotive and social forces inherent in the screen arts dialog with early modern concepts Among the works discussed are digitally oriented films by Peter Greenaway Jean Luc Godard and Chris Marker video installations by Thierry Kuntzel Keith Piper and Renate Ferro and interactive media works by Toni Dove David Rokeby and Jill Scott Sophisticated readings reveal the electronic psychosocial webs and digital representations that link text film and computer Murray puts forth an innovative Deleuzian psychophilosophical approach one that argues that understanding new media art requires a fundamental conceptual shift from linear visual projection to nonlinear temporal fields intrinsic to the digital form Nam June Paik Nam June Paik, Florian Matzner, 1995 This compact
