Naming And Necessity:

Naming and Necessity Saul A. Kripke, 1980 If there is such a thing as essential reading in metaphysics or in philosophy of language this is it Ever since the publication of its original version *Naming and Necessity* has had great and increasing influence It redirected philosophical attention to neglected questions of natural and metaphysical necessity and to the connections between these and theories of reference in particular of naming and of identity From a critique of the dominant tendency to assimilate names to descriptions and more generally to treat their reference as a function of their Fregean sense surprisingly deep and widespread consequences may be drawn The largely discredited distinction between accidental and essential properties both of individual things including people and of kinds of things is revived So is a consequent view of science as what seeks out the essences of natural kinds Traditional objections to such views are dealt with by sharpening distinctions between epistemic and metaphysical necessity in particular by the startling admission of necessary a posteriori truths From these in particular from identity statements using rigid designators whether of things or of kinds further remarkable consequences are drawn for the natures of things of people and of kinds strong objections follow for example to identity versions of materialism as a theory of the mind This seminal work to which today's thriving essentialist metaphysics largely owes its impetus is here published with a substantial new Preface by the author *Naming and Necessity* Saul A.
