Frontiers of Nanotechnology discusses future applications of the technology and the real world issues surrounding these. Outlining developing trends, emerging opportunities, associated risks and future applications, this book is essential reading for professionals, prospective investors and policy makers who need an accessible introduction to the topic. **Nanotechnology: Global Strategies, Industry Trends and Application** Schulte, 2010-03-01. **The Nanotechnology Revolution** Dale A. Stirling, 2018-01-17. Nanotechnology is changing the world in a very big way but at the atomic and sub atomic level. Although the roots of nanotechnology can be traced back to more than a century ago, the last three decades have witnessed an explosion of nano based technologies and products. This reference work examines the history, current status and future directions of nanotechnology through an exhaustive search of the technical and scientific literature. The more than 4000 bibliographic citations it includes are carefully organized into core subject areas and a geographic and subject index allows readers to quickly locate documents of interest. Although a sense of the global reach and interest in nanotechnology can be gleaned from the reference sections of countless journal articles, conference papers and books, this is the only reference work providing an in depth global perspective that is ready made for nanotechnology professionals and those interested in learning more about all things nanotechnology. Despite the abundance of online resources, there is still an urgent need for well researched, well presented, concise and thematically organized reference works. Instead of relying on wiki pages, citation aggregators and related websites, the author searched the databases and databanks of scholarly literature search providers such as EBSCO, ProQuest, PUBMED, STN International and Thomson Reuters. In addition, he used select serials related databases to account for pertinent documents from countries in which English is not the primary national language, i.e. China, Online Journals, e periodica, J STAGE and SciELO Brazil among others. **Nanotechnology in the Agri-Food Sector** Lynn J. Frewer, Willem Norde, Arnout Fischer, Frans Kampers, 2011-02-14. Providing an overview of nanotechnology in the context of agriculture and food science, this monograph covers topics such as nano applications in the agri food sector as well as the social and ethical implications. Following a review of the basics, the book goes on to take an in depth look at processing and engineering, encapsulation and delivery, packaging, crop protection and disease. It highlights the technical, regulatory and safety aspects of nanotechnology in food science and agriculture while also considering the environmental impact. A valuable and accessible guide for professionals, novices and students alike. **Nanomaterials and Nanocomposites** Rajendra Kumar Goyal, 2017-10-30. The main aims of this book are to summarize the fundamentals, synthesis methods, properties and applications of nanomaterials so as to provide readers with a systematic knowledge on nanomaterials. In addition, the book covers most commonly used characterization tools pertaining to nanomaterials. Further, it deals with relevant aspects of nanocomposites which contain dispersion of nano sized particulates and carbon nanotubes (CNTs) in the matrices, polymer, metal and ceramic.
