Project Philippe Cullet, 2017-03-02 The Sardar Sarovar Project has been one of the most debated development projects of the past several decades at both an international level and within India itself Cullet s volume brings together all the key documents relating to the project including those pertaining to World Bank loans the judicial pronouncements of the Supreme Court and documents relating to specific local level issues in particular environment and rehabilitation The work includes an introductory section focusing on the history of the project the involvement of the different actors the impacts on the local population and a general analysis of the controversy surrounding it In providing an easily accessible source for all the main documents relating to this landmark project this compilation will be a valuable resource for researchers and policy makers working in the areas of International Environmental Law and International Development Law *Mega-Dams in World Literature* Margaret Ziolkowski, 2024-04-15 *Mega Dams in World Literature* reveals the varied effects of large dams on people and their environments as expressed in literary works focusing on the shifting attitudes toward large dams that emerged over the course of the twentieth century Margaret Ziolkowski covers the enthusiasm for large dam construction that took place during the mid twentieth century heyday of mega dams the increasing number of people displaced by dams the troubling environmental effects they incur and the types of destruction and protest to which they may be subject Using North American Native American Russian Egyptian Indian and Chinese novels and poems Ziolkowski explores the supposed progress that these structures bring The book asks how the human urge to exploit and control waterways has affected our

relationships to nature and the environment and argues that the high modernism of the twentieth century along with its preoccupation with development casts the hydroelectric dam as a central symbol of domination over nature and the power of the nation state Beyond examining the exultation of large dams as symbols of progress *Mega Dams in World Literature* takes a broad international and cultural approach that humanizes and personalizes the major issues associated with large dams through nuanced analyses paying particular attention to issues engendered by high modernism and settler colonialism Both general and specialist readers interested in human environment relationships will enjoy this prescient book

Stochastic Population Dynamics in Ecology and Conservation Russell Lande,Steinar Engen,Bernt-Erik Sæther,2003 All populations fluctuate stochastically creating a risk of extinction that does not exist in deterministic models with fundamental consequences for both pure and applied ecology This book provides the most comprehensive introduction to stochastic population dynamics combining classical background material with a variety of modern approaches including new and previously unpublished results by the authors illustrated with examples from bird and mammal populations and insect communities Demographic and environmental stochasticity are introduced with statistical methods for estimating them from field data The long run growth rate of a population is explained and extended to include age structure with both demographic and environmental stochasticity Diffusion approximations facilitate the analysis of extinction dynamics and the duration of the final decline Methods are developed for estimating delayed density dependence from population time series using life history data Metapopulation viability and the spatial scale of population fluctuations and extinction risk are analyzed Stochastic dynamics and statistical uncertainty in population parameters are incorporated in Population Viability Analysis and strategies for sustainable harvesting Statistics of species diversity measures and species abundance distributions are described with implications for rapid assessments of biodiversity and methods are developed for partitioning species diversity into additive components Analysis of the stochastic dynamics of a tropical butterfly community in space and time indicates that most of the variance in the species abundance distribution is due to ecological heterogeneity among species so that real communities are far from neutral

Environmentalism and the Mass Media Graham Chapman,Caroline Fraser,Ivor Gaber,Keval Kumar,2003-06-24 Drawing on interviews with journalists media pictures and public opinion surveys in both UK and India the authors outline the differing cultural religious and political contexts which form the world views of North and South

Postcolonial Green Bonnie Roos,Alex Hunt,2010-09-23 *Postcolonial Green* brings together scholarship bridging ecocriticism and postcolonialism Since its inception ecocriticism has been accused of being inattentive to the complexities that colonialism poses for ideas of nature and environmentalism Postcolonial discourse on the other hand has been so immersed in theoretical questions of nationalism and identity that it has been seen as ignoring environmental or ecological concerns This collection demonstrates that ecocriticism and postcolonialism must be understood as parallel projects if not facets of the very same project a struggle for global justice and sustainability The essays in this collection span the globe and

cover such issues as international environmental policy land and water rights food production poverty women s rights indigenous activism and ecotourism They consider all manner of texts from oral tradition to literary fiction to web discourse Contributors bring postcolonial theory to literary traditions such as that of the United States not typically seen in this light and conversely bring ecocriticism to literary traditions such as those of India and China that have seen little ecological analysis Postcolonial Green boasts a global geographical breadth diversity of critical approach and increasing relevance to the issues we face on a world stage Contributors Neel Ahuja University of North Carolina Chapel Hill Pavel Cenkl Sterling College Sharae Deckard University College Dublin Ursula K Heise Stanford University Jonathan Highfield Rhode Island School of Design Alex Hunt West Texas A M University Upamanyu Pablo Mukherjee Warwick University Patrick D Murphy University of Central Florida Bonnie Roos West Texas A M University Caskey Russell University of Wyoming Rachel Stein Siena College Sabine Wilke University of Washington Laura Wright Western Carolina University Sheng yen Yu National Taipei University of Technology Gang Yue University of North Carolina Chapel Hill Xiamen University

Battling the Buddha of Love Jessica Marie Falcone, 2018-09-15 Battling the Buddha of Love is a work of advocacy anthropology that explores the controversial plans and practices of the Maitreya Project a transnational Buddhist organization as it sought to build the world s tallest statue as a multi million dollar gift to India Hoping to forcibly acquire 750 acres of occupied land for the statue park in the Kushinagar area of Uttar Pradesh the Buddhist statue planners ran into obstacle after obstacle including a full scale grassroots resistance movement of Indian farmers working to Save the Land Falcone sheds light on the aspirations values and practices of both the Buddhists who worked to construct the statue as well as the Indian farmer activists who tirelessly protested against the Maitreya Project Because the majority of the supporters of the Maitreya Project statue are converts to Tibetan Buddhism individuals Falcone terms non heritage practitioners she focuses on the spectacular collision of cultural values between small agriculturalists in rural India and transnational Buddhists hailing from Portland to Pretoria She asks how could a transnational Buddhist organization committed to compassionate practice blithely create so much suffering for impoverished rural Indians Falcone depicts the cultural logics at work on both sides of the controversy and through her examination of these logics she reveals the divergent competing visions of Kushinagar s potential futures Battling the Buddha of Love traces power faith and hope through the axes of globalization transnational religion and rural grassroots activism in South Asia showing the unintended local consequences of an international spiritual development project

Alternatives Unincorporated George Zachariah, 2015-01-30 The victims of environmental destruction are often sidelined in eco theology and environmental discourse Movements for ecological

justice fail to take into account the voice of those at the grassroots Alternatives Unincorporated presents an environmental ethics that begins with those on the margins Using the key example of the Narmada Dam in India and the popular resistance movement which built up against the project the book examines the collective action of subaltern communities in caring for their local environment The book frames these movements as theological texts that inform a life affirming earth ethics The aim of the book is to challenge prevailing social and ecological dynamics and to affirm the interconnectedness of social justice and environmental action
