Narrating The Self:

Narrating the Self Tomi Suzuki, 1996 *Narrating the Self* examines the historical formation of modern Japanese literature through a fundamental reassessment of its most characteristic form the I novel an autobiographical narrative thought to recount the details of the writer's personal life thinly veiled as fiction. Closely analysing a range of texts from the late nineteenth century through to the present day the author argues that the I novel is not a given form of text that can be objectively identified but a historically constructed reading mode and cultural paradigm that not only regulated the production and reception of literary texts but also defined cultural identity and national tradition. Instead of emphasising as others have the thematic and formal elements of novels traditionally placed in this category she explores the historical formation of a field of discourse in which the I novel was retroactively created and defined.

Narrating the Self in Early Modern Europe- L'écriture de Soi Dans L'Europe Moderne Bruno Tribout, Ruth Whelan, 2007 The authors of the 16 essays collected in this volume use a variety of approaches to study a broad range of what are now called ego documents from the Renaissance to the beginning of the 19th century.

Narration and Discourse in the Book of Genesis Hugh C. White, 1991

A Theory of Narrative F. K. Stanzel, 1986-03-13 The purpose of this book is to provide a clear and systematic account of the complexities of fictional narration which result from the shifting relationship in all storytelling between the story itself and the way it is told.

Narratology Wolf Schmid, 2010-06-17 This book is a standard work for modern narrative theory. It provides a terminological and theoretical system of reference for future research. The author explains and discusses in detail problems of communication structure and entities of a narrative work point of view the relationship between narrator's text and character's text narrativity and eventfulness and narrative transformations of happenings. The book outlines a theory of narration and analyses central narratological categories such as fiction mimesis author reader narrator etc. A detailed bibliography and glossary of narratological terms make this book a compendium of narrative theory which is of relevance for scholars and students of all literary disciplines.

Law, Human Agency and Autonomic Computing Mireille Hildebrandt, Antoinette Rouvroy, 2011-08-26 *Law Human Agency and Autonomic Computing* interrogates the legal implications of the notion and experience of human agency implied by the emerging paradigm of autonomic computing and the socio technical infrastructures it supports. The development of autonomic computing and ambient intelligence self governing systems challenge traditional philosophical conceptions of human self constitution and agency with significant consequences for the theory and practice of constitutional self government. Ideas of identity subjectivity agency personhood intentionality and embodiment are all central to the functioning of modern legal systems. But once artificial entities become more autonomic and less dependent on deliberate human intervention criteria like agency intentionality and self determination become too fragile to serve as defining criteria for human subjectivity personality or identity and for characterizing the processes through which individual citizens become moral and legal subjects. Are

autonomic yet artificial systems shrinking the distance between acting subjects and acted upon objects How distinctively human will agency be in a world of autonomic computing Or alternatively does autonomic computing merely disclose that we were never in this sense human anyway A dialogue between philosophers of technology and philosophers of law this book addresses these questions as it takes up the unprecedented opportunity that autonomic computing and ambient intelligence offer for a reassessment of the most basic concepts of law An Introduction to Narratology , **The Epistolary Novel** Joe Bray,2003-08-29 The epistolary novel is a form which has been neglected in most accounts of the development of the novel This book argues that the way that the eighteenth century epistolary novel represented consciousness had a significant influence on the later novel Critics have drawn a distinction between the self at the time of writing and the self at the time at which events or emotions were experienced This book demonstrates that the tensions within consciousness are the result of a continual interaction between the two selves of the letter writer and charts the oscillation between these two selves in the epistolary novels of amongst others Aphra Behn Eliza Haywood Samuel Richardson Fanny Burney and Charlotte Smith

Antiquity and the Meanings of Time Duncan F. Kennedy,2013-05-30 Society and contemporary culture seem forever fascinated by the topic of time In modern fiction Ian McEwan The Child in Time and Martin Amis Time s Arrow have led the way in exploring the human condition in relation to past present and future In cinema several cultural texts Memento Minority Report The Hours have similarly reflected a preoccupation with temporality and human experience And in the sphere of politics debates about the end of history prompted by Francis Fukuyama indicate that how we live is deeply determined by our relationship not only to place but also to the passing of time But what did the ancients think about time Is our interest in chronology a relatively recent phenomenon Or does it go further back In his major new work Duncan Kennedy indicates that our own fascination with time reckoning is by no means unique Discussing a number of key texts such as Homer s Odyssey Sophocles Oedipus Rex Virgil s Aeneid and Ovid s Metamorphoses and imaginatively setting these side by side with modern works such as Sterne s Tristram Shandy and Joyce s Ulysses he shows that from era to era and in different ways human beings have uniformly striven to understand the unfolding of history and their relationship to it This sophisticated cross disciplinary book will appeal not only to classicists but also to scholars and students in the humanities more broadly as well as beyond The Self and Its Disorders Shaun Gallagher,2024 Shaun Gallagher puts forward a pluralist account of the self and a philosophical account of psychiatric disorders as disorders of the self He argues that what have been seen as different selves physical social private extended should rather be seen as variable factors or processes organized in a certain pattern this pattern is the self
