Narrating The New Predictive Genetics Ethics Ethnography And Science:

Narrating the New Predictive Genetics Monica Konrad, 2005-02-17 This work explores the way changes in technology have affected the relationship between ethics and medicine generating new approaches to ethical issues and the implications of medical practice Drawing on extensive ethnographic research with families affected by Huntington's Disease Monica Konrad explores the huge disparity between the experience of living with the results of genetic testing and the knowledge and expertise to develop policy clinical services and support

Comparative Empirical Bioethics: Dilemmas of Genetic Testing and Euthanasia in Israel and Germany

Aviad E. Raz, Silke Schicktanz, 2016-04-29 This book is a comprehensive empirically grounded exploration of the relationship between bioethics culture and the perspective of being affected It provides a new outlook on how complex bioethical issues become questions of everyday life The authors focus on two contexts genetic testing and end of life care to locate and demonstrate emerging themes of responsibility such as self responsibility responsibility for kin and the responsibility of society Within these themes the duty to know versus the right not to know one's genetic fate in the context of genetic testing or the sanctity of life versus self determination in the context of end of life care are identified as culturally embedded dilemmas that are very much relevant for lay persons Furthermore cultural factors such as religion history utopian and dystopian views of biomedical technologies outlooks on the body and on health illness and citizenship are examined Health issues are increasingly becoming a question of assessing risk and responsibility How can we better prepare ourselves for the future We all make such assessments in a way that combines personal inclinations professional recommendations and cultural framings There is still much to be learned about the interplay between these three dimensions

Diagnostic Fluidity Mette Bech Risør, Nina Nissen, 2018-01-01 Diagnostic procedures are emblematic of medical work Scholars in the field of social studies of medicine identify diverse dimensions of diagnosis that point to controversies processual qualities and contested evidence In this anthology diagnostic fluidity is seen to permeate diagnostic work in a wide range of contexts from medical interactions in the clinic domestic settings and other relations of affective work to organizational structures and in historical developments The contributors demonstrate each in their own way how different agents do diagnosis highlighting the multi faceted elements of uncertainty and mutability integral to diagnostic work At the same time the contributors also show how in doing diagnosis enactments of subjectivities representations of cultural imaginaries bodily processes and socio cultural changes contribute to configuring diagnostic fluidity in significant ways

Suspect Families Torsten Heinemann, Ilpo Helén, Thomas Lemke, Ursula Naue, Martin Weiss, 2016-03-03 *Suspect Families* is the first book to investigate the social political and ethical implications of parental testing for family reunification in immigration cases Drawing on policy documents legal frameworks case study material and interviews with representatives of governmental and non governmental organisation and immigration authorities immigration lawyers geneticists and applicants for family reunification the book analyses the different political regimes and

social arrangements in which DNA analysis is adopted for decision making on family reunification in three distinct European countries Austria Finland and Germany Interdisciplinary in scope the book reconstructs the processes institutional logic and the political and administrative practices of DNA testing from a comparative perspective combining theoretical conceptualisation with detailed empirical work to explore the central societal political and ethical issues raised by the use of DNA profiling in the context of immigration policy A ground breaking study of the role played by new technologies in migration decisions Suspect Families will appeal to scholars of sociology political science science and technology studies and surveillance studies

Hope and Uncertainty in Health and Medicine Bernhard Hadolt, Andrea Stöckl, 2024-05-06 In health and medicine imagining the future is essential in giving meaning to the past and the present and for propelling people into action This is true not only at the level of individuals as they envision and carry out everyday activities and long term plans but also for institutional practices framed by and unfolding within various socio political ecologies and transfigurations Hope and uncertainty are critical affective and knowledge related modalities of such imaginations and assume vital meanings in policing managing and experiencing health illness and well being This volume brings together contributions from medical anthropologists who address this theme across various medical spheres including the pragmatics of hope and uncertainty the techno sphere health management and individual and socially distributed emotions

Time Work Michael G. Flaherty, Lotte Meinert, Anne Line Dalsgård, 2020-06-09 Examining how people alter or customize various dimensions of their temporal experience this volume discovers how we resist external sources of temporal constraint or structure These ethnographic studies are international in scope and look at many different countries and continents They come to the overall conclusion that people construct their own circumstances with the intention to modify their experience of time

De-Sequencing Dana Mahr, Martina von Arx, 2020-12-07 Are you your genes De Sequencing Identity Work with Genes explores this perplexing question showing how different forms of knowledge must be contextualized to become meaningful It is generally assumed that the genomic sequence adds up to the identity forming material life is made of Yet identity cannot itself adopt the form of a sequence As the authors in this volume show the genome must be de sequenced by human language to render it interpretable and meaningful in a social context The book unpacks this type of sequence speech in engaging detail adopting a personal social cultural and bio political approach to examine the transformation of human identity and reflexivity in the era of genetic citizenship

Biomedicine as Culture Regula Valérie Burri, Joseph Dumit, 2007-11-21 This volume offers interdisciplinary perspectives on contemporary biomedicine as a cultural practice It brings together leading scholars from cultural anthropology sociology history and science studies to conduct a critical dialogue on the culture s of biomedical practice discussing its epistemic material and social implications The essays look at the ways new biomedical knowledge is constructed within hospitals and academic settings and at how this knowledge changes perceptions material arrangements and social relations not only within clinics and scientific communities but especially once it is diffused into a broader cultural

context **Extractions** M. Nahman, 2013-01-17 Michal Nahman traces different kinds of extraction the practices of human egg harvesting in different national contexts the political economic consequences of such extraction for the women involved and the ways in which this has consequences for nationalism and race or Israeli extraction **Biosocialities, Genetics and the Social Sciences** Sahra Gibbon, Carlos Novas, 2007-07-20 This pioneering collection uses Paul Rabinow's concept of biosociality to chart the shifts in social relations and in ideas about nature biology and identity brought about by developments in biomedicine
