Thompson, 2017-09-29 Any life story whether a written autobiography or an oral testimony is shaped not only by the reworkings of experience through memory and re evaluation but also by art Any communication has to use shared conventions not only of language itself but also the more complex expectations of genre the forms expected within a given context and type of communication This collection of essays by international academics draws on a wide range of disciplines in the social sciences and the humanities to examine how far the expectations and forms of genre shape different kinds of autobiography and influence what messages they can convey After investigating the problem of genre definition and tracing the evolution of genre as a concept contributors explore such issues as How far can we argue that what people narrate in their autobiographical stories is selected and shaped by the repertoire of genre available to them To what extent is oral autobiography shaped by its social and cultural context What is the relationship between autobiographical sources and the ethnographer Narrative and Genre presents exciting new debates in an emerging field and will encourage international and interdisciplinary discussion Its authors and contributors are scholars from the fields of anthropology cultural studies literary analysis psychology psychoanalysis social history and sociology

Strategic Narratives Alister Miskimmon, Ben O'Loughlin, Laura Roselle, 2014-02-18 Communication is central to how we understand international affairs Political leaders diplomats and citizens recognize that communication shapes global politics This has only been amplified in a new media environment characterized by Internet access to information social media and the transformation of who can communicate and how Soft power public diplomacy 2.0 network power scholars and policymakers are concerned with understanding what is happening This book is the first to develop a systematic framework to understand how political actors seek to shape order through narrative projection in this new environment To explain the changing world order the rise of the BRICS the dilemmas of climate change poverty and terrorism the intractability of conflict the authors explore how actors form and project narratives and how third parties interpret and interact with these narratives The concept of strategic narrative draws together the most salient of international relations concepts including the links between power and ideas international and domestic and state and non state actors The book is anchored around four themes order actors uncertainty and contestation Through these Strategic Narratives shows both the possibilities and the limits of communication and power and makes an important contribution to theorizing and studying empirically contemporary international relations International Studies Association International Communication Best Book Award

Narrative Persuasion. A Cognitive Perspective on Language Evolution Francesco Ferretti, 2022-08-23 This book explores the evolutionary and cognitive foundations of human communication focusing on narrative as its distinctive dimension Within a framework of continuity with both the communication of our hominin predecessors and that of non human animals the book is about a twofold proposal It includes the idea that human and animal communication has an intrinsically persuasive nature along with the hypothesis that humans developed narrative forms of communication in order to enhance their persuasive abilities In this view narrative persuasion

becomes the feature that distinguishes human communication from animal communication The study of the transition from animal communication to language addresses both the selective pressures that led communication for persuasive purposes to take a narrative form and the cognitive architectures and expressive systems that enabled our ancestors to cope with the selective pressures of persuasive narrative based communication Language evolution is interdisciplinary even from the specific perspective of evolutionary pragmatics chosen here Therefore this book is intended for researchers working in fields such as cognitive sciences philosophy evolutionary biology cognitive psychology and primatology It also represents a valuable resource for advanced students in cognitive sciences linguistics and philosophy
