Narrative and Discourse

Narrative Discourse

Robert E. Longacre

Narrative Discourse:

Narrative Discourse Gérard Genette, 1980 Genette uses Proust's *Remembrance of Things Past* as a work to identify and name the basic constituents and techniques of narrative Genette illustrates the examples by referring to other literary works His systemic theory of narrative deals with the structure of fiction including fictional devices that go unnoticed and whose implications fulfill the Western narrative tradition *Narrative Discourse Revisited* Gérard Genette, 1988 In *Narrative Discourse Revisited* Genette both answers critics of the earlier work and provides a better defined richer and more systematic view of narrative form and functioning This book not only clarifies some of the more complex issues in the study of narrative but also provides a vivid tableau of the development of narratology over the decade between the two works

Narrative Discourse Gérard Genette, 1987 *The Content of the Form* Hayden White, 1990-08 The secret of the process by which consciousness invests history with meaning resides in the content of the form in the way our narrative capacities transform the present into a fulfillment of a past from which we would wish to have descended **Analyzing Narrative** Anna De Fina, Alexandra Georgakopoulou, 2011-11-24 The socially minded linguistic study of storytelling in everyday life has been rapidly expanding This book provides a critical engagement with this dynamic field of narrative studies addressing long standing questions such as definitions of narrative and views of narrative structure but also more recent preoccupations such as narrative discourse and identities narrative language power and ideologies It also offers an overview of a wide range of methodologies analytical modes and perspectives on narrative from conversation analysis to critical discourse analysis to linguistic anthropology and ethnography of communication The discussion engages with studies of narrative in multiple situational and cultural settings from informal intimate to institutional It also demonstrates how recent trends in narrative analysis such as small stories research positioning analysis and sociocultural orientations have contributed to a new paradigm that approaches narratives not simply as texts but rather as complex communicative practices intimately linked with the production of social life *Patterns of Narrative Discourse* Allyssa McCabe, Lynn S. Bliss, 2003 Multicultural backgrounds are taken into consideration when dealing with assessment intervention and education **BOOK JACKET** **Events, States and Times** Daniel Altshuler, 2016-11-07 This monograph investigates the temporal interpretation of narrative discourse in two parts The theme of the first part is narrative progression It begins with a case study of the adverb now and its interaction with the meaning of tense The case study motivates an ontological distinction between events states and times and proposes that now seeks a prominent state that holds throughout the time described by the tense Building on prior research prominence is shown to be influenced by principles of discourse coherence and two coherence principles NARRATION and RESULT are given a formally explicit characterization The key innovation is a new method for testing the definitional adequacy of NARRATION and RESULT namely by an abductive argument This contribution opens a new way of thinking about how eventive and stative descriptions contribute to the perceived narrative

progression in a discourse The theme of the second part of the monograph is the semantics and pragmatics of tense A key innovation is that the present and past tenses are treated as scalar alternatives a view that is motivated by adopting a particular hypothesis concerning stative predication The proposed analysis accounts for tense in both matrix clauses and in complements of propositional attitudes where the notorious double access reading arises This reading is explored as part of a corpus study that provides a glimpse of how tense semantics interacts with Gricean principles and at issue-ness Several cross linguistic predictions of the analysis are considered including their consequences for the Sequence of Tense phenomenon and the Upper Limit Constraint Finally a hypothesis is provided about how tense meanings compose with temporal adverbs and verb phrases Two influential analysis of viewpoint aspect are then compared in light of the hypothesis The monograph is directed at graduate students and researchers in semantics pragmatics and philosophy of language The analysis of narrative discourse that is developed in the monograph synthesizes and builds on prior collaborative research with Corien Bary Valentine Hacquard Thomas Roberts Roger Schwarzschild Una Stojni K roly Varasdi and Aaron White Daniel Altshuler is an Assistant Professor of Linguistics at the School of Cognitive Science Hampshire College and an Adjunct Professor of Linguistics at the University of Massachusetts Amherst

Narrative Discourse Gérard Genette, 1980-01 Deals particularly with Proust

The Grammar of Discourse Robert E. Longacre, 1996-06-30 The Second Edition of The Grammar of Discourse critically evaluates and updates Robert E Longacre s ambitious work dedicated to the thesis that language is language only in context and that context s natural role in the resolution of sentence ambiguities has been overlooked for too long by linguists This new edition advances even further the discourse revolution which Longacre predicted in the First Edition would come in response to the demand for greater explanatory power through context The most cogent application of this one which makes the book unique among linguistics texts is the author s exhaustive investigation into the interface of the morphosyntax of a language with its textual structures This expanded volume builds upon its predecessor s major points with new chapters increasing the coverage of paragraph and clause structure the latter being handled in a new chapter which solves a problem posed in the original edition how holistic concerns of structure especially the recognition of different strands of information relate to the constituent structure of discourse The insights contained in this chapter create an opportunity to tie in current discussions of transitivity ergativity the antipassive agency hierarchy order preserving transformations and word order concerns into the structure of discourse Other noteworthy features of the Second Edition include The integration of information salience local dominance and paragraph type to answer the question What makes a discourse followable A study of dialogue relations The formalization of the interrelations of tagmeme and syntagmeme and of the varieties of exponence on the various levels of hierarchy The use of an expanded and enriched statement calculus to better pinpoint logical relations between predication The use of a similarly enriched predicate calculus to present case frames A stepped diagram presentation of paragraph level analyses With material tested in classes at the University of Texas Arlington this influential

work merits serious consideration as a text for first year graduate courses in linguistics *Fictions of Discourse* Patrick
O'Neill, 1994-01-01 O'Neill investigates the extent to which narrative discourse subverts the story it tells in foregrounding its
own performance
