Narrativity, Coherence and Literariness Eva Sabine Wagner, 2020-06-08 The search for the defining qualities of narrative has produced an expansive range of definitions which largely unconnected with each other obscure the notion of narrativity rather than clarifying it The first part of this study remedies this shortcoming by developing a graded macro model of narrativity which serves three aims Firstly it provides a structured overview of the field of narrative elements and processes Secondly it facilitates the classification of narratological approaches by locating them on different stages of narrativity Finally it focuses attention on narrative dynamics as interpretative processes by which readers seek to produce narrative coherence The second part of this study identifies three different narrative dynamics which characterise Laclos's *Dangerous Connections* Kafka's *Castle* and Toussaint's novels Wagner bases her analyses of these dynamics not only on the texts themselves but also on the ways in which literary scholars imbue the texts with narrative coherence This book provides a long overdue systematisation of the jumbled field of theories of narrativity and opens new perspectives on the difficult relationship between narrative theory and interpretation
