Although the consequences are not seen immediately they will in the longer term reinforce learned helplessness of the participants or beneficiaries who are usually relegated to passive or dependent roles Through the insights of contributors who are practitioners in the community development field this book argues that more resources and initiatives must be accorded to community organisations so as to redirect to a community or resident centric approach towards community work intervention In short more reaching out to people or community groups should be undertaken Covering a broad range of arenas including health housing ageing community integration and bonding among others this book will open up a wider horizon for community development efforts and provide a reservoir of ideas and strategies to build a stronger and resilient community for more effective community problem solving

**Re-embodying Pastoral Theology** Johann Choi, 2024-05-29 With the dominance of psychotherapeutic theories and methods in the field of pastoral theology the typical pastoral encounter has been understood to be a private conference in which a pastor addresses a sufferer's thoughts and emotions What results is a kind of dualism that is contrary to a historically Christian affirmation of and concern for the body The phenomenon of moral injury further problematizes this model of pastoral care in part due to a greater awareness that trauma is imprinted as much in the body as in the mind Re-embodying Pastoral Theology uses the problem of moral injury in veterans to propose a pastoral theology that recognizes ritual as the means by which the Christian community addresses the body in pastoral care In advancing this new approach to ritual care the author draws from the fields of psychology ritual studies liturgical studies and historical theology as well as the experiences of veterans throughout history This book endeavors to re-think the Christian approach to moral injury and re-embody the field of pastoral theology

problems manage psychiatric symptoms and cope with medical illnesses      Creative Arts in Counseling and Mental Health Philip Neilsen,Robert King,Felicity Baker,2015-06-26 Drawing on new paradigms and evidence based discoveries in neuroscience narrative psychology and creativity theory this text explores the beneficial role of expressive arts within a recovery perspective A framework of practice principles for the visual arts creative writing music drama dance and digital storytelling is addressed across a number of settings and populations providing readers with an accessible overview of techniques taught in counseling programs in the U S and abroad      Relational Being Kenneth J. Gergen,2009-07-30 This book builds on two current developments in psychology scholarship and practice The first centers on broad discontent with the individualist tradition in which the rational agent or autonomous self is considered the fundamental atom of social life Critique of individualism spring not only from psychologists working in the academy but also from communities of therapy and counseling The second and related development from which this work builds is the search for alternatives to individualist understanding Thus therapists such as Steve Mitchell along with feminists at the Stone Center expand the psychoanalytic tradition to include a relational orientation to therapy The present volume will give voice to the critique of individualism but its major thrust is to develop and illustrate a far more radical and potentially exciting landscape of relational thought and practice that now exists Most existing attempts to build a relational foundation remain committed to a residual form of individualist psychology The present work carves out a space of understanding in which relational process stands prior to the very concept of the individual More broadly the book attempts to develop a thoroughgoing relational account of human activity In doing so Gergen reconstitutes the mind as a manifestation of relationships and bears out these ideas in a range of everyday professional practices including family therapy collaborative classrooms and organizational psychology
