Shame and Glory Peter Hennessy, 2024-03-20 A compelling account of the transformative changes Britain is facing today exploring how we can build a post COVID society 2021 and 2022 were two of the most turbulent and disruptive years experienced by Britain in peacetime *Land of Shame and Glory* Britain 2021 22 addresses a series of unprecedented challenges that laid bare the fragility of Britain and the Union during this time Beginning with the chaotic Fall of Kabul which exposed Britain's military dependence on the United States through the prolonged unsatisfying removal of a prime minister and the economically catastrophic short lived tenure of his successor that further exposed the vulnerabilities of an unwritten constitution to the country sweltering in record breaking temperatures amid dire warnings of climate catastrophe and finally to the death of a much loved monarch who was a point of consistency during decades of tremendous social and technological change Peter Hennessy considers the continuities and upheavals of the last seventy years asking whether there can be said to have been a second Elizabethan Age and lamenting that the post war period came to its close amid such upheaval and loss

Academy to the officer's wardroom then pressed on to claim the wings of a naval aviator and become a superlative fighter pilot and a published author. More unusual still, he possessed extraordinary people skills that allowed him to deal and move with relative ease among Navy compatriots, foreign combat pilots, left-wing literati in Madrid and Paris, and the rural folk of Arkansas, Mississippi, and Louisiana who embraced him as one of their own. While in Spain, Tinker socialized with Ernest Hemingway, Robert Hale Merriman, the leader of the American Volunteers of the Lincoln Brigade, and his successor Milton Wolff, who led the 15th International Brigade during the Battle of the Ebro. All this he managed before his death at age twenty-nine. Second, the book focuses on the aerial tactics introduced in the Spanish Civil War that became standard military practice a few years later in World War II. Included are descriptions of the German introduction of the "Finger Four" fighter formation that replaced the V of three or four formation then in vogue, the first use of military airlift to move large numbers of troops and equipment into combat, the greater accuracy and destructiveness of dive bombers vice high-altitude bombers, perfection of the silent approach used by high-altitude bombers before the introduction of radar, early warning, and air intelligence reports that asserted daylight high-altitude bombers could not get through and return from enemy territory successfully without the protection of fighter cover. U.S. Army Air Corps leaders at that time had fashioned a doctrine that the high-speed, high-altitude, self-defending daylight bomber would always get through and rejected these intelligence reports at a subsequent cost in lives of hundreds of high-altitude bomber aircrews in Europe in World War II.
