NASA, the First 25 Years, 1958-1983 United States. National Aeronautics and Space Administration, 1983 **Echoes Among the Stars: A Short History of the U.S. Space Program** Patrick J. Walsh, 2016-04-29 Emphasizing the importance of the space programme to the scientific social and cultural history of the last half of the 20th century this brief history celebrates the almost unimaginable technological leap that the space programme represents a feat of teamwork innovation dedication and mastery unprecedented in the history of mankind Walsh s narrative begins just before the Mercury programme covers the original seven astronauts the Gemini and Apollo programmes through Skylab and up to the space shuttle The glories and emotion of space exploration are presented against the backdrop of the Cold War the presidential administrations of Eisenhower JFK LBJ Nixon Ford and Carter and other significant events in US history The positive accomplishments of the astronauts are put in context of an increasingly negative domestic situation in the 60s and 70s the Bay of Pigs civil rights assassinations growing involvement in and dissension about Vietnam the Watergate scandal and Nixon s resignation **NASA Report to Educators** ,1983 **NASA CORE, Central Operation of Resources for Educators** United States. by this threat and makes recommendations as to how they can improve their programs While the report identified many positive aspects of NASA s MMOD programs and efforts including responsible use of resources it recommends that the agency develop a formal strategic plan that provides the basis for prioritizing the allocation of funds and effort over various MMOD program needs Other necessary steps include improvements in long term modeling better measurements more regular updates of the debris environmental models and other actions to better characterize the long term evolution of the debris environment
