Foreword by Nicholas Hytner

Our Country Grant R. Brodrecht, 2018-06-05 On March 4 1865 the day Abraham Lincoln delivered his second inaugural address Reverend Doctor George Peck put the finishing touches on a collection of his sermons that he intended to send to the president Although the politically moderate Peck had long opposed slavery he along with many other northern evangelicals was not an abolitionist During the Civil War he had come to support emancipation but like Lincoln the conflict remained first and foremost about preserving the Union Believing their devotion to the Union was an act of faithfulness to God first and the Founding Fathers second *Our Country* explores how many northern white evangelical Protestants sacrificed racial justice on behalf of four million African American slaves and then ex slaves for the Union's persistence and continued flourishing as a Christian nation By examining Civil War era Protestantism in terms of the Union

author Grant Brodrecht adds to the understanding of northern motivation and the eventual failure of Reconstruction to provide a secure basis for African American's equal place in society. Complementing recent scholarship that gives primacy to the Union, Our Country contends that non-radical Protestants consistently subordinated concern for racial justice for what they perceived to be the greater good. Mainstream evangelicals did not enter Reconstruction with the primary aim of achieving racial justice. Rather, they expected to see the emergence of a speedily restored prosperous and culturally homogenous Union, a Union strengthened by God through the defeat of secession and the removal of slavery as secession's cause. Brodrecht eloquently addresses this so-called proprietary regard for Christian America considered within the context of crises surrounding the Union's existence and its nature from the Civil War to the 1880s. Including sources from major Protestant denominations, the book rests on a selection of sermons, denominational newspapers and journals, autobiographies, archival personal papers of several individuals and the published and unpublished papers of Abraham Lincoln, Andrew Johnson and Ulysses S. Grant. The author examines these sources as they address the period's evangelical sense of responsibility for America while keyed to issues of national and presidential politics. Northern evangelicals' love of the Union arguably contributed to its preservation and the slaves' emancipation, but in subsuming the ex-slaves to their vision for Christian America, northern evangelicals contributed to a Reconstruction that failed to ensure the ex-slaves full freedom and equality as Americans.

The Undivided Past David Cannadine, 2013-03-19 An impassioned controversial plea for us to recognise the importance of writing history from world famous historian David Cannadine. David Cannadine is one of Britain's most distinguished historians and this is his masterpiece. *The Undivided Past* is an agonised attempt to understand how so much of the writing of history has been driven by a fatal desire to dramatize differences to create an us versus them. Great works of history have so often had at their heart a wish to sift people in ways that have been profoundly damaging and provided the intellectual backing and justification for terrible political decisions. Again and again categories have been found whether religion, nation, class, gender, race or civilization that have sought to explain world events by fabricating some malevolent or helpless other. This book is above all an appeal to common humanity. We seem doomed always to fall most recently in the wake of 9/11 into the us versus them trap, but there is no reason why the history we read and write should not be much better than this and describe what we all have in common rather than what divides us. About the author: Sir David Cannadine is Chair of the National Portrait Gallery, Dodge Professor of History at Princeton University and General Editor of the Penguin History of Europe and Penguin History of Britain. He is a Fellow of the British Academy and the Chair of the Blue Plaques Committee. His major books include *The Rise and Fall of the British Aristocracy*, *Ornamentalism* and *Mellon A Life*. He is currently writing the Penguin History of Victorian Britain. He has previously taught at Cambridge, Columbia and London universities.

The Quest for the Primordial Elisa Vitali, 2023-07-31 Although fifty years passed since the boom of the theories on Japanese national character and considerable academic literature was produced to debunk its ideological tenets

the Nihonjinron still plays a significant role in the mainstream public discourse on Japanese identity Intellectuals journalists policymakers routinely repropose the ever lasting cliché of Japanese cultural linguistic racial uniqueness In doing so they adopt a primordialist stance in the narration of Japanese identity that is a conception of Japanese nation as a primordial entity located in an original fatherland since immemorial times Drawing on the writings of Suzuki Takao and Watanabe Shoichi the book analyses the rhetorical strategies and discursive features supporting essentialist ideas of Japaneseness At the same time it highlights the heuristic value of primordialism as an effective descriptor of the nationalist ideology thus challenging its widespread usage as a category of analysis

Adapting Nations Alon Helled, Carlo Pala, 2025-05-28 Nations adapt Nations are resilient both within and outside the boundaries of statehood Yet scholarship tends to downplay nationhood as it focuses on the polity As a consequence the investigation of modern societies though usually articulated around the nation state model falls into state centrism whilst neglecting the other side of the coin This book initiates an interdisciplinary debate that encourages research in a field that has largely been overlooked in European social and political sciences The analysis offered by the authors reinstates the concept of the nation beyond the traditional and somewhat dichotomous schools of thought hence neither judging the nation as a mere invention nor as a deterministic product of history The book provides those interested in nationalism with new approaches to exploring national identity and its connection to statehood By using concepts inspired by political science and sociology namely habitus survival unit polity hysteresis and so forth the different chapters of the volume revitalise the inquiry of the dimensions and features in which the nation and the identification they engender become tools of adaptation in relation to the transformative reality of

our own contemporaneity The authors thus contextualise the latter via the mid range concept of national resilience at both meso and macro levels
