Vernacular and Earthen Architecture: Conservation and Sustainability Camilla Mileto,Fernando Vegas López-Manzanares,Lidia García-Soriano,Valentina Cristini,2017-09-01 Vernacular architecture in general and earthen architecture in particular with their rich variety of forms worldwide are custodians of the material culture and identity of the peoples who built them In addition they are widely recognized as ancestral examples of sustainability in all their variants and interpretations and the architecture of the present ought to learn from these when designing the sustainable architecture of the future The conservation of these architectures seemingly simple yet full of wisdom is to be undertaken now given their intrinsic value and their status as genuine examples of sustainability to be learnt from and interpreted in contemporary architecture Vernacular and earthen architecture Conservation and Sustainability will be a valuable source of information for academics and professionals in the fields of Environmental Science Civil Engineering Construction and Building Engineering and Architecture **Columbia Alumni News** ,1928 *Transcultural Architecture* Thorsten Botz-Bornstein,2016-03-09 Critical Regionalism is a notion which gained popularity in architectural debate as a synthesis of universal modern elements and individualistic elements derived from local cultures This book shifts the focus from Critical Regionalism towards a broader concept of Transcultural Architecture and defines Critical Regionalism as a subgroup of the latter One of the

benefits that this change of perspective brings about is that a large part of the political agenda of Critical Regionalism which consists of resisting attitudes forged by typically Western experiences is softened and negotiated according to premises provided by local circumstances A further benefit is that several responses dependent on factors that initial definitions of Critical Regionalism never took into account can now be considered At the book's centre is an analysis of Reima and Raili Pietilä's Sief Palace Area project in Kuwait Further cases of modern architecture in China Korea and Saudi Arabia show that the critique which holds that Critical Regionalism is a typical western exercise is not sound in all circumstances The book argues that there are different Critical Regionalisms and not all of them impose Western paradigms on non Western cultures Non Western regionalists can also successfully participate in the Western enlightened discourse even when they do not directly and consciously act against Western models Furthermore the book proposes that a certain architectural rationality can be contained in architecture itself not imposed by outside parameters like aesthetics comfort or even tradition but flowing out of a social game of which architecture is a part The key concept is that of the form of life as developed by Ludwig Wittgenstein whose thoughts are here linked to Critical Regionalism Kenneth Frampton argues that Critical Regionalism offers something well beyond comfort and accommodation What he has in mind are ethical prescripts closely linked to a

Migrants in the Digital Periphery Matt Mahmoudi, 2025-02-04 As the fortification of Europe's borders and its hostile immigration terrain has taken shape so too have the biometric and digital surveillance industries And when US Immigration Customs Enforcement aggressively reinforced its program of raids detention and family separation it was powered by Silicon Valley corporations In cities of refuge where communities on the move once lived in anonymity and proximity to familial and diaspora networks the possibility for escape is diminishing As cities rely increasingly on tech companies to develop digital urban infrastructures for accessing information identification services and socioeconomic life at large they also invite the border to encroach further on migrant communities networks and bodies In this book Matt Mahmoudi unveils how the unsettling convergence of Silicon Valley logics austere and xenophobic migration management practices and racial capitalism has allowed tech companies to close in on the final frontiers of fugitivity and suggests how we might counteract their machines through our own refusal **Engineering News and American Contract Journal**, 1917
