unprecedented man made crisis The Birds of Northern Melanesia Ernst Mayr, Jared M. Diamond, 2001 Speciation is the process by which co existing daughter species evolve from one ancestral species e g humans chimpanzees and gorillas arising from a common ancestor around 5 000 000 years ago However many questions about speciation remain controversial The Birds of Northern Melanesia provides by far the most comprehensive study yet available of a rich fauna composed of the 195 breeding land and fresh water bird species of the Bismarck and Solomon Archipelagoes east of New Guinea This avifauna offers decisive advantages for understanding speciation and includes famous examples of geographic variation discussed in textbooks of evolutionary biology The book results from 30 years of collaboration between the evolutionary biologist Ernst Mayr and the ecologist Jared Diamond It shows how Northern Melanesian bird distributions provide snapshots of all stages in speciation from the earliest widely distributed species without geographic variation to the last closely related reproductively isolated species occurring sympatrically and segregating ecologically The presentation emphasizes the wide diversity of speciation outcomes steering a middle course between one model fits all simplification and ungeneralizable species accounts Questions illuminated include why some species are much more prone to speciate than others why some water barriers are much more effective at promoting speciation than others and whether hypothesized taxon cycles faunal dominance and legacies of Pleistocene land bridges are real These years of study have resulted in a huge database complete with distributions of all 195 species on 76 islands together with their taxonomy colonization routes ecological attributes abundance and overwater dispersal Color plates depict 88 species and allospecies many of which have never been seen before For students of speciation Northern Melanesian birds now constitute a model system against which other biotas can be compared For population biologists interested in other problems besides speciation this rich database can now be mined for insights Wildlife Review ,1994 *ALICE & SIDNEY GO TO PAPUA NEW GUINEA!* Paul Watkins, 2020-01-21 A humorously illustrated duo of children s books take two pairs of youngsters on exciting journeys across America and to a mysterious tropical island Alice and Sidney live in Australia Their grandfather Charlie collects birds of all sorts in pictures and glass cases gathered from many parts of the world His favourites are tropical birds There is one however that he has never seen This is the most splendid of all the Bird of Paradise which lives north of Australia in Papua New Guinea Alice and Sidney decide that they will travel to Papua to find and photograph the fabulous bird They are helped in their quest by the pilot Bob and his assistant Willy who has another unexpected guise and who leads them into amazing adventures **Biogeography and Ecology of New Guinea** J.L. Gressitt, 2012-12-06 J L Gressitt New Guinea is a fantastic island unique and fascinating It is an area of incredible variety of geomorphology biota peoples languages history traditions and cultures Diversity is its prime characteristic whatever the subject of interest To a biogeographer it is tantalizing as well as confusing or frustrating when trying to determine the history of its biota To an ecologist and to all biologists it is a happy hunting ground of endless surprises and unanswered questions To a conservationist it is like a dream come true a flash back

of a few centuries as well as a challenge for the future New Guinea is so special that it is hard to compare it with other islands or tropical areas It is something apart with its very complicated history chapters I 2 4 II 1 4 III I VI I 2 It is partly old but to a great extent very young yet extremely rich and complex It has biota of different sources to such a degree that it is still disputed in this volume as to what Realm it belongs to the Paleotropical or Notogaeian Australian or what Region Oriental Oceanic Papuan or Australian The terms Papuasian Indo Australian and Australasian also have been applied to the area

Archaeological Research at Caution Bay, Papua New Guinea Thomas Richards, Bruno David, Ken Aplin, 2016-12-31 The first volume of the Caution Bay monographs is designed to introduce the goals of the Caution Bay project the nature and scope of the investigations and the cultural and natural setting of the study area *The Report: Papua New Guinea 2015* Oxford Business Group, 2016-09-17 In Papua New Guinea hopes are high that real change is on its way the country's political administrative financial and technical leaders now have to find a way to ensure the most productive distribution and use of financial resources Many international actors are watching closely to see how this young country negotiates its path Papua New Guinea became a major exporter of gas in 2014 when the 19bn PNG liquefied natural gas LNG project was completed ahead of schedule and within budget significantly increasing the size and strength of the economy The year ahead is likely to see PNG benefit from the further development of its hydrocarbons sector fuelling the growth of its economy as a whole The LNG influx also poses challenges however in terms of ensuring inclusive growth and productive use of the new revenues PNG takes pride in being a final frontier of natural and cultural development but the task ahead is to protect the country's heritage while becoming part of the global economy *Papua New Guinea Conservation Needs Assessment* Janis B.

Alcorn, 1993 **Top 100 Birding Sites of the World** Dominic Couzens, 2008 My first response after reading this book was to reach for the phone and start booking tours to go see birds This book's combination of dynamic photography and scope of coverage makes for a truly compelling exploration John T Rotenberry University of California Riverside **New Guinea** Bruce M. Beehler, 2020-05-19 Combining a wealth of information a descriptive and story filled narrative and more than 200 stunning color photographs the book unlocks New Guinea's remarkable secrets like never before **Too Many Bird Books** Geoffrey Dabb, 2023-08-01 This is a chronicle of encounters with a lot of bird books in fact a lifetime of such encounters The world of bird books is vast and varied defying coherent descriptions The author's qualification for making this attempt to describe it is that he owns several hundred of them gathered over more than 70 years To help make sense of this obsession the description of the books is linked to life in which traditional birdwatching and book hunting went on in different places and in between other things *Geography of Trafficking* Fred M. Shelley, Reagan Metz, 2017-10-27 This important reference work examines trafficking from a geographic perspective and investigates the driving forces behind it and the powers that are trying to curtail the problem The worldwide crime of trafficking involves countless people animals and animal parts and illicit goods such as drugs and weapons being moved and sold illegally Often the trafficking occurs with the local government

or law enforcement's knowledge and complicity This one volume encyclopedia sheds light on a frightening and major issue investigating the geography of trafficking and examining a range of examples of illegal human animal drug and weapons movement around the world After a preface and introduction that provides an exact definition of trafficking the encyclopedia presents thematic essays that explore the various specific kinds of trafficking Approximately 30 country profiles describe who and what is trafficked in each country the motivations of those doing the trafficking where people and things are being moved to how the trafficking occurs and what actions are being taken in an effort to prevent it An appendix of primary documents interesting sidebars a bibliography and a glossary listing key terms and important organizations round out the work
