The Person and Primary Emotions Peter A. Bertocci,2012-12-06 I shall propose that the

unlearned motives of persons are primary emotions I am not surprised that many informed readers will wonder where I have been for the last five decades when even the conception of unlearned motives instincts drives urges has been shown to be little more than the result of undisciplined investigation And here I am proposing that in the nature and dynamics of some emotions that persons experience we can gain more adequate understanding of human motives at the unlearned level During the last five decades I have spent most of my time teaching the history of philosophy metaphysics philosophy of religion ethics and theory of value the psychology of personality and the philosophy of personality Increasingly I have paid special attention to the ways in which claims about the nature of man influence the theory of motives emotions and feelings What kept impressing me is the way in which the interpretation of the findings about motives feelings and emotion reflect unargued conceptions of human nature or that the views of fundamental motives feelings and emotions unduly dominate the underlying conception of the person In focusing attention first on the essential nature of a person I shall be discussing issues that are actually basic to our more analytical interpretation of the nature and dynamics of the primary motives or primary emotions

Assessment and Intervention for Executive Function Difficulties George McCloskey,Lisa A. Perkins,Bob Van Diviner,2008-12-05 In Assessment and Intervention for Executive Function Difficulties McCloskey Perkins and Diviner provide a unique blend of theory research and practice that offers clinicians an overarching framework for the concept of executive functions EFs in educational settings The conceptual model of executive functions is detailed including their role in behavior learning and production across all settings The heart of the book focus on the practical issues involved in the use of assessment tools tests report writing and the implementation and follow up of targeted interventions using the EF model Six case studies are introduced in Chapter 1 and followed throughout the book building understanding of the executive function difficulties of each child assessment for identifying the difficulties and interventions for dealing with the difficulties An additional case study is discussed in detail in one of the concluding chapters and downloadable resources will provide the practitioner with a wealth of assessment forms parent and teacher handouts behavior tracking charts and report documentation forms

Current Research and Emerging Directions in Emotion-Cognition Interactions Florin Dolcos, Lihong Wang, Mara Mather, 2015-03-02 Emotion can impact various aspects of our cognition and behavior by enhancing or impairing them e g enhanced attention to and memory for emotional events or increased distraction produced by goal irrelevant emotional information On the other hand emotion processing is also susceptible to cognitive influences typically exerted in the form of cognitive control of motion or emotion regulation Despite important recent progress in understanding emotion cognition interactions a number of aspects remain unclear The present book comprises a collection of manuscripts discussing emerging evidence regarding the mechanisms underlying emotion cognition interactions in healthy functioning and alterations associated with clinical conditions in which such interactions are dysfunctional Initiated with a more restricted focus targeting 1 identification and in depth analysis of the circumstances in which emotion enhances or impairs cognition and 2 identification of the role of individual differences in these effects our book has emerged into a comprehensive collection of outstanding contributions investigating emotion cognition interactions based on approaches spanning from behavioral and lesion to pharmacological and brain imaging and including empirical theoretical and review papers alike Co hosted by the Frontiers in Neuroscience Integrative Neuroscience and Frontiers in Psychology Emotion Science the contributions comprising our book and the associated research topic are grouped around the following seven main themes distributed across the two hosting journals I Emotion and Selectivity in Attention and Memory II The Impact of Emotional Distraction Linking Enhancing and Impairing Effects of Emotion III What Really is the Role of the Amygdala IV Age Differences in Emotion Processing The Role of Emotional Valence V Affective Face Processing Social Cognition and Personality Neuroscience VI Stress Mood Emotion and the Prefrontal Cortex The Role of Control in the Stress Response VII Emotion Cognition Interactions in Clinical Conditions As illustrated by the present collection of contributions emotion cognition interactions can be identified at different levels of processing from perception and attention to long term memory decision making processes and social cognition and behavior Notably these effects are subject to individual differences that may affect the way we perceive experience and remember emotional experiences or cope with emotionally challenging situations Moreover these opposing effects tend to co occur in affective disorders such as depression and PTSD where uncontrolled recollection of and rumination on distressing memories also lead to impaired cognition due to emotional distraction Understanding the nature and neural mechanisms of these effects is critical as their exacerbation and co occurrence in clinical conditions lead to devastating effects and debilitation Hence bringing together such diverse contributions has allowed not only an integrative understanding of the current extant evidence but also identification of emerging directions and concrete venues for future investigations

Emotions and the Body Beatrice de Gelder, 2016 Emotions and the Body investigates the role that bodies play in the expression and perception of emotions Using state of the

art research in the neuropsychology of emotional face and body disorders Beatrice de Gelder discusses the neural basis and temporal processing signatures of emotional body language

Explicit and Implicit Emotion Processing: Neural Basis, Perceptual and Cognitive Mechanisms Giulia Mattavelli, Alessia Celeghin, Noemi Mazzoni, 2021-06-23 *Character Computing* Alia El Bolock, Yomna Abdelrahman, Slim Abdennadher, 2020-01-01 The book gives an introduction into the theory and practice of the transdisciplinary field of Character Computing introduced by Alia El Bolock The latest scientific findings indicate that One size DOES NOT fit all in terms of how to design interactive systems and predict behavior to tailor the interaction experience Emotions are one of the essential factors that influence people's daily experiences they influence decision making and how different emotions are interpreted by different individuals For example some people may perform better under stress and others may break Building upon Rosalind Picard's vision if we want computers to be genuinely intelligent and to interact naturally with us we must give computers the ability to recognize understand even to have and express emotions and how different characters perceive and react to these emotions hence having richer and truly tailored interaction experiences Psychological processes or personality traits are embedded in the existing fields of Affective and Personality Computing However this book is the first that systematically addresses this including the whole human character namely our stable personality traits our variable affective cognitive and motivational states as well as our morals beliefs and socio cultural embedding The book gives an introduction into the theory and practice of the transdisciplinary field of Character Computing The emerging field leverages Computer Science and Psychology to extend technology to include the whole character of humans and thus paves the way for researchers to truly place humans at the center of any technological development Character Computing is presented from three main perspectives Profiling and sensing the character Leveraging characters to build ubiquitous character aware systems Investigating how to extend Artificial Intelligence to create artificial characters

Emotion Regulation and Psychopathology in Children and Adolescents Cecilia A. Essau, Sara S. LeBlanc, Thomas H. Ollendick, 2017-05-19 Emotions are a cardinal component of everyday life affecting one's ability to function in an adaptive manner and influencing both intrapersonal and interpersonal processes such as self esteem and relationship satisfaction However when emotions are overpowering they can become debilitating and intrusive in daily life In general emotion regulation competencies become differentiated as a function of development Children tend to seek support from adults or use behavioral techniques to regulate their emotions As children reach adolescence they become increasingly self reliant engaging in playful problem solving and utilizing cognitive strategies for example reappraisal more frequently when faced with stressful life events While the majority of children and adolescents will successfully navigate these developmental stages by cultivating adaptive coping skills for some this marks the beginning of lifelong challenges with emotion regulation and resultant dysregulation This book provides a guide to dealing with these problems with contributions from leading experts in the field Divided into 4 sections it starts by providing an introduction to the field of emotion

regulation in adolescents touching upon the cultural social biological and developmental issues related to this topic Section two discusses several psychological disorders impacting adolescents such as anxiety depression and conduct problems while also discussing the underlying role emotion regulation plays in the development maintenance and propagation of these disorders In addition this section considers the implication for treatment by discussing the latest evidence based intervention approaches The third section focuses on the role of emotion regulation in specific behaviour populations such as children of abuse and neglect as well as adolescents who engage in nonsuicidal self injury The final section includes an epilogue discussing emergent areas of research answering questions of a theoretical psychological and empirical nature For all those working in the field of mental health whether novice or experienced the book provides a valuable guide to understanding and treating these increasingly common problems
