Arner, 1972      **The Oxford Handbook of Reasons and Normativity** Daniel Star, 2018 The Oxford Handbook of Reasons and Normativity maps a central terrain of philosophy and provides an authoritative guide to it Few concepts have received as much attention in recent philosophy as the concept of a reason to do or believe something And one of the most contested ideas in philosophy is normativity the ought in claims that we ought to do or believe something This is the first volume to provide broad coverage of the study of reasons and normativity across multiple philosophical subfields In addition to focusing on reasons in ethics epistemology and the philosophy of mind action and language the Handbook explores philosophical work on the nature of normativity in general Topics covered include the unity of normativity the fundamentality of reasons attempts to explain reasons in other terms the relation of motivational reasons to normative reasons the internalist constraint the logic and language of reasons and ought connections between reasons intentions choices and actions connections between reasons reasoning and rationality connections between reasons knowledge understanding and evidence reasons encountered in perception and testimony moral principles prudence and reasons agent relative reasons epistemic challenges to our access to reasons normativity in relation to meaning concepts and intentionality instrumental reasons pragmatic reasons for belief aesthetic reasons and reasons for emotions      *Human Knowledge According to Saint Maximus the Confessor* Nevena Dimitrova, 2016-10-12 This book is dedicated to the synergic process of divine human communion in the humanly possible knowledge of God according to Saint Maximus the Confessor These various types of knowledge play an important but as yet unexplored role in Maximus the Confessor's teaching on God which in many respects appears to be a synthesis and culmination of the Greek patristic tradition and the antecedent of ancient pre Christian and Christian philosophy Focus on this problem brings forth the major issues of Maximus psychology the soul body relationship and a detailed examination of the cognitive capacities of the soul including the perception of the senses rational activity and operations of the mind The indivisibility of the gnoseological issues from medieval man is traced in an examination of the cognitive levels within the trichotomic structure of practical philosophy natural contemplation and theology The two methods both affirmative cataphatic and negative apophatic demonstrate the two rational discourses in human knowledge of God Special attention is given to the understanding of hexis and gnomic concepts and their crucial place in the cognitive structure leading to knowledge of God as Goodness and of God as Truth      *Motivation and the Primacy of Perception* Peter Antich, 2021-02-01 Merleau Ponty's phenomenological notion of motivation advances a compelling alternative to the empiricist and rationalist assumptions that underpin modern epistemology Arguing that knowledge is ultimately founded in perceptual experience Peter Antich interprets and defends Merleau Ponty's thinking on motivation as the key to establishing a new form of epistemic grounding Upending the classical dichotomy between reason and natural causality justification and explanation Antich shows how this epistemic ground enables Merleau Ponty to offer a radically

new account of knowledge and its relation to perception In so doing Antich demonstrates how and why Merleau Ponty remains a vital resource for today s epistemologists *Oxford Handbook of Reasons and Normativity* Daniel Star,2018-05-31 The Oxford Handbook of Reasons and Normativity maps a central terrain of philosophy and provides an authoritative guide to it Few concepts have received as much attention in recent philosophy as the concept of a reason to do or believe something And one of the most contested ideas in philosophy is normativity the ought in claims that we ought to do or believe something This is the first volume to provide broad coverage of the study of reasons and normativity across multiple philosophical subfields In addition to focusing on reasons in ethics epistemology and the philosophy of mind action and language the Handbook explores philosophical work on the nature of normativity in general Topics covered include the unity of normativity the fundamentality of reasons attempts to explain reasons in other terms the relation of motivational reasons to normative reasons the internalist constraint the logic and language of reasons and ought connections between reasons intentions choices and actions connections between reasons reasoning and rationality connections between reasons knowledge understanding and evidence reasons encountered in perception and testimony moral principles prudence and reasons agent relative reasons epistemic challenges to our access to reasons normativity in relation to meaning concepts and intentionality instrumental reasons pragmatic reasons for belief aesthetic reasons and reasons for emotions
