recent years many prominent and successful artists have claimed that their primary concern is not the artwork they produce but the artistic process itself In this volume Kim Grant analyzes this idea and traces its historical roots showing how changing concepts of artistic process have played a dominant role in the development of modern and contemporary art This astute account of the ways in which process has been understood and addressed examines canonical artists such as Monet C zanne Matisse and De Kooning as well as philosophers and art theorists such as Henri Focillon R G Collingwood and John Dewey Placing process art within a larger historical context Grant looks at the changing relations of the artist s labor to traditional craftsmanship and industrial production the status of art as a commodity the increasing importance of the body and materiality in art making and the nature and significance of the artist s role in modern society In doing so she shows how process is an intrinsic part of aesthetic theory that connects to important contemporary debates about work craft and labor Comprehensive and insightful this synthetic study of process in modern and contemporary art reveals how artists explicit engagement with the concept fits into a broader narrative of the significance of art in the industrial and postindustrial world
