Culture, Communication, and National Identity Richard Collins, 1990-01-01 There can be no political sovereignty without culture sovereignty So argued the CBC in 1985 in its evidence to the Caplan Sauvageau Task Force on Broadcasting Policy Richard Collins challenges this assumption He argues in this study of nationalism and Canadian television policy that Canada's political sovereignty depends much less on Canadian content in television than has generally been accepted His analysis focuses on television drama at the centre of television policy in the 1980s Collins questions the conventional image of Canada as a weak national entity undermined by its population's predilection for foreign television Rather he argues Canada is held together not by a shared repertoire of symbols a national culture but by other social forces notably political institutions Collins maintains that important advantages actually and potentially flow from Canada's weak national symbolic culture Rethinking the relationships between television and society in Canada may yield a more successful broadcasting policy more popular television programming and a better understanding of the links between culture and the body politic As the European Community moves closer to political unity the Canadian case may become more relevant to Europe which Collins suggests already fears the Canadianization of its

television He maintains that a European multilingual society without a shared culture or common European audio visual sphere and with viewers watching foreign television can survive successfully as a political entity just as Canada has

Communication and Culture in War and Peace Colleen Roach, 1993-02-01 Roach provides an excellent account of the contributions of feminist peace researchers to the analysis of cultural militarism and its twin cultural violence against women Altogether this book is a worthy enterprise that will help both activists and scholars gain a more in depth understanding of the barriers to change erected by the media s use of information technology and will be useful in developing scenarios and strategies for the creative use of that technology for peaceful social transformation Elise Boulding in *Media Development* Does the media have a perverse fascination with war and violence Do television newspapers and magazines neglect the forces of peace in favor of the more dramatic war machines thereby amplifying the guns rather than muting them If so how does media coverage reflect the culture for which it works By exploring the role of both culture and mass media this volume fills a crucial void in the study of war and peace Outstanding scholars provide a history and overview of critical mass media research and investigate emerging issues dealing with the ongoing debate over communication in war and peace Several chapters deal specifically with the role of communication culture in the Gulf War while others discuss more general themes including the military industrial communication complex cultural imperialism and transnational control of communication Many of the essays offer a uniquely feminist reading of war and peace a perspective typically unacknowledged in mainstream communication work This timely book also weaves peripheral concerns like multiculturalism international communication law women and peace and communication technology into the primary themes of media and war The research and practical information given here will be useful for courses in peace and conflict studies international mass communication and intercultural communication Professionals in international relations negotiations and the media will find this book to be both fascinating and illuminating Original research on the coverage of disarmament stories and peace issues in Canadian dailies and Vincent Mosco s excellent blueprint for converting the military machine to a peace system give Roach s work practical and positive dimensions Abstracts at the beginning of the chapters full bibliographies and a preface by the father of peace studies Johan Galtung add to the importance of this book Recommended for anyone interested in the use minuses of mass media to cover up explain
