

PERFORMANCE-BASED LEARNING

DEFINITION

Performance-based learning focuses on students demonstrating specific skills and competencies, rather than just acquiring knowledge. It emphasizes real-world application and requires students to produce tangible, meaningful products or performances. The assessment is based on the outcome of these tasks rather than traditional tests or exams.

EXAMPLES

- **Science Experiment:** Students design and conduct an experiment to understand a scientific concept, then present their findings and conclusions.
- **Portfolio Creation:** Rather than taking a written test on art techniques, art students compile a portfolio showcasing their use of different techniques and styles.

volume is particularly relevant for university and school based teacher educators who help prepare teachers to work in urban schools and for personnel in state departments of education and other agencies who are responsible for certification and beginning teacher support. While the focus is on preparing teachers for urban settings the theoretical and practical foundations and the case studies have broad implications and provide useful insights for anyone involved in developing and using performance assessment systems: teacher educators, university and school administrators, classroom teachers and educational researchers.

The Oxford Handbook of Assessment Policy and Practice in Music Education, Volume 1 Timothy S. Brophy, 2019-01-02. In the music classroom instructors who hope to receive aid are required to provide data on their classroom programs. Due to the lack of reliable valid large scale assessments of student achievement in music however music educators in schools that accept funds face a considerable challenge in finding a way to measure student learning in their classrooms. From Australia to Taiwan to the Netherlands music teachers experience similar struggles in the quest for a definitive assessment resource that can be used by both music educators and researchers. In this two volume Handbook contributors from across the globe come together to provide an authority on the assessment measurement and evaluation of student learning in music. The Handbook's first volume emphasizes international and theoretical perspectives on music education assessment in the major world regions. This volume also looks at technical aspects of measurement in music and outlines situations where theoretical foundations can be applied to the development of tests in music. The Handbook's second volume offers a series of practical and US focused approaches to music education assessment. Chapters address assessment in different types of US classrooms, how to assess specific skills or requirements and how assessment can be used in tertiary and music teacher education classrooms. Together both volumes of *The Oxford Handbook of Assessment in Music Education* pave the way forward for music educators and researchers in the field.

Teaching Performance Assessments as a Cultural Disruptor in Initial Teacher Education Claire Wyatt-Smith, Lenore Adie, Joce Nuttall, 2021-08-23. This book explores how well teachers are prepared for professional practice. It is an outcome of a large scale research and development program that has collected extensive data on the impact of the Graduate Teacher Performance Assessment on Initial Teacher Education programs and preservice teachers' engagement with the assessment. It contributes to international debates in teacher education by examining an Australian experience of teacher performance assessments as a catalyst for cultural change and practice reform in teacher education. The respective chapters describe and critique this unique multi institutional investigation into the quality of teacher education and present substantial evidence drawing on a variety of conceptual, empirical and methodological entry points. Further they address the intellectual, experiential and personal resources and related expertise that teacher educators and preservice teachers bring to their practice. Taken together they offer readers clearly conceptualised and evidence rich accounts of site specific and cross site investigations into cultural, pedagogical and assessment change in Initial Teacher Education.
