*Child Autonomy and Child Governance in Children's Literature* Christopher Kelen,Bjorn Sundmark,2016-11-18 This book explores representations of child autonomy and self governance in children s literature The idea of child rule and child realms is central to children s literature and childhood is frequently represented as a state of being with children seen as aliens in need of passports to Adultland and vice versa In a sense all children s literature depends on the idea that children are different separate and in command of their own imaginative spaces and places Although the idea of child rule is a persistent theme in discussions of children s literature or about children and childhood the metaphor itself has never been properly unpacked with critical reference to examples from those many texts that are contingent on the authority and or power of children Child governance and autonomy can be seen as natural or perverse it can be displayed as a threat or as a promise Accordingly the child rule motif can be seen in Robinsonades and horror films in philosophical treatises and in series fiction The representations of self ruling children are manifold and ambivalent and range from the idyllic to the nightmarish Contributors to this volume visit a range of texts in which children are in various ways empowered discussing whether childhood itself may be thought of as a nationality and what that may imply This collection shows how representations of child governance have been used for different ideological aesthetic and pedagogical reasons and will appeal to scholars of children s literature childhood studies and cultural studies

*Experiencing the Impossible* Gustav Kuhn, 2019-03-12. This thought-provoking tour through the science of magic will make you question what you know about your brain and your reality. A psychologist and magician shows how the scientific study of magic reveals intriguing and often unsettling insights into the mysteries of the human mind. What do we see when we watch a magician pull a rabbit out of a hat or read a person's mind? We are captivated by an illusion, we applaud the fact that we have been fooled. Why do we enjoy experiencing what seems clearly impossible or at least beyond our powers of explanation? In *Experiencing the Impossible*, Gustav Kuhn examines the psychological processes that underpin our experience of magic. Kuhn, a psychologist and a magician, reveals the intriguing and often unsettling insights into the human mind that the scientific study of magic provides. Magic, Kuhn explains, creates a cognitive conflict between what we believe to be true—for example, a rabbit could not be in that hat—and what we experience: a rabbit has just come out of that hat. Drawing on the latest psychological, neurological, and philosophical research, he suggests that misdirection is at the heart of all magic tricks, and he offers a scientific theory of misdirection. He explores, among other topics, our propensity for magical thinking, the malleability of our perceptual experiences, forgetting and misremembering, free will and mind control, and how magic is applied outside entertainment: the use of illusion in human-computer interaction, politics, warfare, and elsewhere. We may be surprised to learn how little of the world we actually perceive, how little we can trust what we see and remember, and how

little we are in charge of our thoughts and actions Exploring magic Kuhn illuminates the complex and almost magical mechanisms underlying our daily activities **Magic Tricks for Kids** Phil Ackerly, 2025-06-17 Learn magic and performance skills with 25 astounding magic tricks Want to learn how to levitate a coffee cup Magically double your money Become a mind reader Discover the secrets to these tricks and more in Magic Tricks for Kids Watch jaws drop as you perform these wonderful illusions using simple step by step instructions and homemade props Gain confidence with easier tricks at the start of the book before moving on to more complex magic tricks that require sleight of hand skills Finally learn some spellbinding card tricks and how to make items appear out of thin air You ll wow your family and friends while learning the art of a mesmerizing performance Magic Tricks for Kids includes DIY magic All the magic tricks use simple household objects making them easy to perform anytime A chapter on magical crafts also shows you how to make a magic wand a magic box and a magic table to help you put on fantastic shows at home The code Learn the respected Magician s Code including the most important rule never reveal how the trick is done More than magic With sample scripts to go along with each trick you ll learn the art of patter injecting your performance with comedy suspense and surprise With Magic Tricks for Kids you ll blow minds and astonish your friends
