**Bounding Power** Daniel H. Deudney, 2010-12-16 Realism the dominant theory of international relations particularly regarding security seems compelling in part because of its claim to embody so much of Western political thought from the ancient Greeks to the present Its main challenger liberalism looks to Kant and nineteenth century economists Despite their many insights neither realism nor liberalism gives us adequate tools to grapple with security globalization the liberal ascent and the American role in their development In reality both realism and liberalism and their main insights were largely invented by republicans writing about republics The main ideas of realism and liberalism are but fragments of republican security theory whose primary claim is that security entails the simultaneous avoidance of the extremes of anarchy and hierarchy and that the size of the space within which this is necessary has expanded due to technological change In Daniel Deudney s reading there is one main security tradition and its fragmentary descendants This theory began in classical antiquity and its pivotal early modern and Enlightenment culmination was the founding of the United States Moving into the

industrial and nuclear eras this line of thinking becomes the basis for the claim that mutually restraining world government is now necessary for security and that political liberty cannot survive without new types of global unions Unique in scope depth and timeliness *Bounding Power* offers an international political theory for our fractious and perilous global village

*Systems, Relations, and the Structures of International Societies* Jack Donnelly, 2023-11-02 Inspired by recent work in evolutionary developmental and systems biology *Systems Relations and the Structures of International Societies* sketches a robust conception of systems that grounds a new conception of levels of organization not merely analysis Understanding international systems as multi level multi actor complex adaptive systems allows explanations of important features of the world that are inaccessible to dominant causal and rationalist explanatory strategies It also develops a comprehensive critique of IR s dominant conception of systems and structures narrow rigid and unfruitful presents a novel conception of the interrelationship of the social production of continuities and the social production of change and sketches models of spatio political structure that cast new light on the development of international systems including a distinctive account of the nature of globalization **National Perils and Opportunities** Evangelical Alliance for the United States of America.

General Christian Conference, 1888 **The Realism Reader** Colin Elman, Michael Jensen, 2014-08-12 The Realism Reader provides broad coverage of a centrally important tradition in the study of foreign policy and international politics After some years in the doldrums political realism is again in contention as a leading tradition in the international relations sub field Divided into three main sections the book covers seven different and distinctive approaches within the realist tradition classical realism balance of power theory neorealism defensive structural realism offensive structural realism rise and fall realism and neoclassical realism The middle section of the volume covers realism s engagement with critiques levelled by liberalism institutionalism and constructivism and the English School The final section of the book provides materials on realism s engagement with some contemporary issues in international politics with collections on United States U S hegemony European cooperation and whether future threats will arise from non state actors or the rise of competing great powers The book offers a logically coherent and manageable framework for organizing the realist canon and provides exemplary literature in each of the traditions and dialogues which are included in the volume Offering substantial commentary and analysis and including enhanced pedagogy to facilitate student learning The Realism Reader will provide a one stop shop for undergraduates and masters students taking a course in contemporary international relations theory with a particular focus on realism **Handbook of International Relations** Walter Carlsnaes, Thomas Risse, Beth A

*Power and Issue Framing in the Contemporary World* M. N. I. Sorkar, 2022-03-16 This book puts forward a new angle of understanding the society of states in the milieu of the contemporary world The absence of a regulatory mechanism i.e. anarchy has been the fundamental issue of international relations This book explains how the normative imperatives information and communication technology ICT and nuclear deterrence generated ambiance have poised the states in a society where they are bound to follow certain normative imperatives that dilute the color and meaning of anarchy and obliges the states to act in a certain way It develops a theoretical proposition with regard to state power defined in terms of the capability of determining the outcomes The proposition first elaborates how international institutions foster normative imperatives then in line with this ontology it narrows down the focus solely on the power of the states in the contemporary world It explains how the power that can determine the outcome today is holistic in nature comprising both materialistic and normative factors In the next step it tailors the proposition in a way so as to employ it for a specific empirical work The book does not end just positing the theoretical proposition the proposition is testified through some case studies with regard to climate negotiations under the UNFCCC The empirical part not only serves to examine the plausibility of the theoretical proposition but it also presents the logic of the major actors and the politics with respect to some of the major issues of climate change i.e. mitigation funding policy and mechanism and adaptation The scholars in this arena climate activists and climate conscious people in general would find this book worth reading as it kindles a different angle to understand the issues in the context of the contemporary

world and as it elaborates the logic framing process and mechanism of reaching outcomes through complex negotiation process No other work has so far analyzed the issues covering the entire period of 21 apex UNFCCC negotiations that led to the Paris Agreement Apart from university libraries this book thus has the prospect to be sold in the markets targeting the academicians climate change experts bureaucrats negotiators and the common readers

**The Nature and Destiny of Man** Reinhold Niebuhr, 2021-11-02 The Nature and Destiny of Man issues a vigorous challenge to Western civilization to understand its roots in the faith of the Bible particularly in the Hebraic tradition Niebuhr here lays out his influential understanding of the two poles of human existence finitude and freedom Individual human thriving requires that we fully understand and honor both of these aspects of our nature yet human history demonstrates our penchant for placing one over the other This book is arguably Reinhold Niebuhr's most important work It offers a sustained articulation of Niebuhr's theological ethics and is considered a landmark in twentieth century thought

*War* Paul Francis Diehl, 2005

**Regional Peacemaking and Conflict Management** Carmela Lutmar, Benjamin Miller, 2015-11-06 This volume examines mechanisms for regional peacemaking and conflict management in Europe and the Middle East To date little research has been devoted to uncovering the conditions for peace and the factors that contribute to stabilizing the state of peace This volume assesses the factors that contribute to regional pacification the incentives that motivate states in establishing peaceful relations and most importantly how regions become peaceful It discusses the conditions under which various types of peace might emerge on a regional level and the factors most likely to determine the outcome The book takes an innovative approach through a

systematic comparison of two regions that are particularly prominent and important for the subject of regional pacification Europe and the Middle East While many believe that the European case is the indispensable model for peacemaking others believe that these two regions are too different for Europe to be a useful framework for the Middle East This volume occupies a middle ground between these two extreme positions It argues that while a mindless copying of European models will not lead to peace in the Middle East important insights can be gained from the most successful case of regional peacemaking to date This work will be of much interest to students of regional security peacemaking conflict management Middle East politics European security and IR in general

Miller, 1998-09-15 New approaches to understanding war and peace in the changing international system What causes war How can wars be prevented Scholars and policymakers have sought the answers to these questions for centuries Although wars continue to occur recent scholarship has made progress toward developing more sophisticated and perhaps more useful theories on the causes and prevention of war This volume includes essays by leading scholars on contemporary approaches to understanding war and peace The essays include expositions analyses and critiques of some of the more prominent and enduring explanations of war Several authors discuss realist theories of war which focus on the distribution of power and the potential for offensive war Others examine the prominent hypothesis that the spread of democracy will usher in an era of peace In light of the apparent increase in nationalism and ethnic conflict several authors present hypotheses on how nationalism causes war and how such wars can be controlled Contributors also engage in a vigorous debate on whether international institutions can promote peace In a section on war and peace in the changing international system several authors consider whether rising levels of international economic independence and environmental scarcity will influence the likelihood of war

**The Decalogue and a Human Future** Paul L. Lehmann, 2002-03-15 An important book for theology ethics and the church James H Cone This book displays all the depth penetrating insight and clarity of thinking that have become the hallmarks of Lehmann's writing It mercilessly and wonderfully exposes the superficiality and frivolousness of many of the arguments surrounding the Decalogue Theologically instructive intellectually satisfying and spiritually uplifting Allan Boesak Paul Lehmann was one of the greatest of America's Christian ethicists and one of its most influential teachers His work has had a profound impact on many persons especially pastors and lay folk This final work brings him back to some of his major themes the relation of the gospel and law the commitment to a truly human life in this world that is shaped by God's just and loving activity in Jesus Christ and the need for the gift of discernment to see what it is that makes and keeps human life human One does not expect to hear much that is fresh on such worked over moral issues as abortion and homosexuality but in these pages Lehmann makes us think afresh and challenges us even on those familiar topics It is sad to think that we shall hear no more from this deeply Christian and moral thinker Patrick D Miller Princeton Theological Seminary This is vintage Lehmann His koinonia ethic continues to make

enormous sense not least in South Africa and other transitional situations where people are seeking moral discernment amid complexity and ambiguity in the quest for social justice This book s development of Lehmann s ethic around the Ten Commandments makes it more than a textbook for students It is a book for pastors the laity and the general public It is also a wonderful culmination to the work of a great theologian Charles Villa Vicencio University of Cape Town South Africa
