Peripheral Neurology Case Studies:

Peripheral Neurology Jay Allan Liveson, 2000-09-21 Peripheral Neurology was the first book to innovatively utilize case presentations as a vehicle to teach peripheral neurology. In fact, it was the first to categorize the field of peripheral neurology as most other neurology texts concentrated on diseases of the central nervous system. This case approach has since been emulated in many other texts and on various web sites. Emphasizing the clinical condition rather than electrodiagnostic technique, each topic is thoroughly addressed first in the Fundamental Concepts of Part I and then in multiple Case Studies presented in Part II. The reader is able to simulate a true clinical environment where a diagnosis has to be arrived at with no organizational clues from the text. Formulating conclusions by analyzing the history, physical and laboratory data and linking from case to related case, this is the only text which allows this type of interactive reading. The book addresses many rare entities that the author is able to present based on his 30 years of experience. **Peripheral Neurology** Jay Allan

Liveson, Steven Howard Horowitz, 1992 **Peripheral Neurology** Jay Allan Liveson, Neil Irwin Spielholz, Steven Howard Horowitz, 1979 **Neuromuscular Case Studies E-Book** Tulio E. Bertorini, 2023-10-27 Ideal for neurologists and other health care professionals who treat patients with neuromuscular diseases, Neuromuscular Case Studies 2nd Edition presents more than 100 cases of both common and rare neuromuscular disorders. Dr. Tulio E. Bertorini provides the latest tools and strategies for diagnosis and management that minimize disability and maximize quality of life for your patients, including up to date coverage of numerous recent advances in the field. Using a multidisciplinary approach, this practical text contains two parts: the first includes basic aspects of anatomy, physiology, diagnostic tests and therapeutic strategies; the second describes specific cases and their diagnosis and management. Presents a multidisciplinary approach to the management and therapeutic treatment of the full range of neuromuscular disorders and resulting complications. Covers the latest advances in the field, including genetic causes of hereditary diseases, new autoimmune diseases and promising new therapies such as antisense oligonucleotides, gene therapies and immunotherapy. Includes the wide range of disorders that fall under each disease classification, e.g., the Motor Neuron Diseases chapter includes all forms of spinal atrophy, ALS, neuropathies and myopathies, as well as disorders of neuromuscular transmission. In turn, each disease section includes diagnosis and evaluation, treatment outcome and suggested readings. Uses a reader friendly format that takes you step by step through the diagnosis and treatment of neuromuscular disorders from the basic anatomy and physiology of the nerve and muscle through to clinical evaluation, diagnostic testing and therapy. Reviews the etiologies, pathogenesis, differential diagnosis and management of each disorder, helping you not only recognize its presentation but also determine the best treatment plan. Arranges case studies and indexes both by complaint and by diagnosis. Features full color clinical images and diagrams along with numerous diagnosis tools, tables and treatment algorithms throughout that make complex concepts easier to understand and apply. Shares the knowledge and experience of an expert in clinical neuromuscular care. **Case Studies in**
