Kingston USA Rachel Carson is the twentieth century's most significant environmentalist. Her books about the sea blend science and poetry as they invite readers to share her celebration of the ocean's wonders. *Silent Spring*, her graphic and compelling exposé of the damage caused by the widespread aerial spraying of persistent organic pesticides such as DDT, opened our eyes to the interconnectedness of all living beings and the ecological systems we inhabit. Carson's work challenges our belief that science and technology can control the natural world; it asks us to recognize our place in the world around us and inspires us to treat the earth respectfully. She calls us to rekindle our sense of wonder at nature's power and beauty and to tread lightly on the earth so that it will continue to sustain us and our descendants. This book guides readers on a journey through Carson's life and work, considers Carson's legacies, and points to some of the continuing challenges to sustainability. It provides a listing of resources for reading, learning, or teaching about the environment, about nature writing, and about Carson and the crucial issues she addressed.

The Undead Office Adrian Ferruelo, 2025-05-26 *The Undead Office* In a world where monsters are real but no longer feared, a group of misfit creatures is just trying to get by. Meet Vlad, a vampire working in IT who's allergic to garlic; Luna, a werewolf struggling with anger management; and Zeke, a zombie trying to fit in at a corporate job where his rotting flesh keeps causing awkward situations. *Monsters Inc.* is a laugh-out-loud comedy that reimagines classic monsters navigating the absurdities of modern life. From dating apps to office politics, these creatures face challenges that are both hilariously relatable and uniquely monstrous. Perfect for fans of *What We Do in the Shadows* and *Good Omens*, this novel will have you rooting for the underdogs or should we say, the undermonsters.

The Monterey Bay Shoreline Guide Jerry Emory, 1999 Healthy oceans are critical to the future of all life on Earth, yet by and large the underwater world remains hidden to us, unknown and mysterious. The mission of the Monterey Bay Aquarium is to inspire conservation of the oceans, and this series of books is intended to further that goal. By helping people discover their connection with the natural world, we hope to foster a lifelong commitment to learning about and caring for the oceans on which all life depends. Julie Packard, Executive Director, Monterey Bay Aquarium.

Life Between the Tides Adam Nicolson, 2025-08-22 Adam Nicolson explores the marine life inhabiting seashore rockpools with a scientist's curiosity and a poet's wonder in this beautifully illustrated book. The sea is not made of water; creatures are its genes. Look down as you crouch over the shallows, and you will find a periwinkle or a prawn, a claw displaying crab or a cluster of anemones ready to meet you. No need for binoculars or special stalking skills; go to the rocks, and the living will say hello. Inside each rock pool, tucked into one of the infinite crevices of the tidal coastline, lies a rippling, silent, unknowable universe. Below the stillness of the surface, a course of different currents of endless motion: the ebb and flow of the tide, the steady forward propulsion of the passage of time, and the tiny lifetimes of the rock pool's creatures, all of which coalesce into the grand narrative of evolution. In *Life Between the Tides*, Adam Nicolson investigates one of the most revelatory habitats on earth. Under his microscope, we see a prawn's head become a medieval helmet, and a group of winkles transform into a Dickensian social scene with mollusks.
