The Mercery of London Anne F. Sutton, 2016-12-05 Although mercers have long been recognised as one of the most influential trades in medieval London, this is the first book to offer a comprehensive and detailed analysis of the trade from the twelfth to the sixteenth century. The variety of mercery goods, linen, silk, worsted and small manufactured items including what is now called haberdashery, gave the mercers of London an edge over all competitors. The sources and production of all these commodities is traced throughout the period covered. It was as the major importers and distributors of linen in England that London mercers were able to take control of the Merchant Adventurers and the export of English cloth to the Low Countries. The development of the Adventurers Company and its domination by London mercers is described from its first privileges of 1296 to after the fall of Antwerp. This book investigates the earliest itinerant mercers and the artisans who made and sold mercery goods such as the silkwomen of London, so often mercers' wives, and their origins in counties like Norfolk, the source of linen and worsted. These diverse traders were united by the neighbourhood of the London Mercery on Cheapside and by their need for the privileges of the freedom of London. Extensive use of Netherlandish and French sources puts the London Mercery into the context of European Trade and literary texts add a more personal image of the merchant and his preoccupation with his social status which rose from that of the despised pedlar to the advisor of princes. After a slow start, the Mercers Company came to include some of the wealthiest and most powerful men of London and administer a wide range of charitable estates such as that of Richard Whittington. The story of how they survived the vicissitudes inflicted by the wars and religious changes of the sixteenth century concludes this fascinating and wide-ranging study.

Battle of Flodden 1513 John Sadler, Rosie Serdiville, 2011-11-30 The Battle of Flodden in 1513 was the largest battle ever to take place between England and Scotland. James IV himself led an army of 30,000 men over the border into England, ostensibly in

revenge for the murder of a Scotsman but in reality to assist their ally the French by diverting the forces of Henry VIII Yet the Scots were hampered by old fashioned weapons and tactics whereas the English deployed more accurate artillery and their vaunted longbowmen When King James IV was killed while leading a charge and many of their officers died the Scots were left in disarray and the English victory was decisive As the first new history of the battle in a decade this authoritative and eye opening account marks the 500th anniversary and brings our knowledge of the conflict up to date Expert knowledge and detailed maps look at the key events the 1135 campaign and the minor battles of Millfield and Norham and a full profile of the respective forces and deployments and convey the battle s course concisely and clearly A key read for those interested in military history or the period in general
