Person Perception and Attribution Hans-Werner Bierhoff, 2012-12-06 Person perception is of great importance in everyday life and human science Judgment of other people's characteristics and intentions is important for successfully planning actions within a social environment Questions about the formation of impressions and causal attributions are central to social psychology and the study of diagnostic judgment formation The field of person perception deals with questions of how impression formation proceeds what characteristics and intentions are attributed to other people and how preformed schemata and stereotypes influence people's first impressions Research on person perception developed rapidly after the Second World War In the 1950s the precision and accuracy of person perception received special interest but the problems concerning whether an individual's assessment of another personality is exact or not could not be solved Another approach which began in the 1940s and was derived from the Gestalt psychological tradition dealt with impression formation based on selected social cues This approach which proved to be very useful had considerable influence on both the research methods and the theoretical orientation of the research work On the one hand by using a combination of individual cues like physical characteristics researchers tried to ascertain how an impression of a person was formed On the other hand the Gestalt psychological orientation led to an interest in the process of person perception which in the last 10 years has concentrated on questions concerning information reception and processing

Creating the Russian Peril Troy R. E. Paddock, 2010 German attitudes toward and stereotypes of Russia before the First World War and how they were inculcated in the public The causes of the First World War have been studied and debated for many decades yet cultural historians of Germany have largely neglected the German Russian aspect of the conflict for a focus on the clash of Germany and Great Britain When they have focused on Germany and Russia they have too often dismissed the anti Russian propaganda of the war's first months as a sudden and opportunistic campaign to justify the war This intellectual and cultural history gives German attitudes toward and stereotypes of Russia their due re-examining them through the lens of German national identity and revealing an evolving obsession with Russia during the quarter century leading up to the war when Germany came to consider itself a Western nation with Russia to use Edward Said's terminology as an Oriental other While historians have addressed the issue of an Oriental Russia this book extends the analysis beyond traditional intellectual history's focus on cultural elites by studying the construction of Russia in school textbooks newspapers and the writings of academics Drawing upon the work of Said Jürgen Habermas Sander Gilman and Pierre Bourdieu Troy Paddock demonstrates that public debate on Russia was based on common assumptions and contends that these assumptions which resulted in the ascendancy of a view of Russia as the Slavic peril in the last few years before the war were ingrained in the public through education Troy Paddock is Professor of History at Southern Connecticut State University

Kowalski, Mark R. Leary, 2004 Publisher Description **How the Mind Explains Behavior** Bertram F. Malle, 2006-08-11 In this provocative monograph Bertram Malle describes behavior explanations as having a dual nature as being both cognitive and social acts and proposes a comprehensive theoretical model that integrates the two aspects When people try to understand puzzling human behavior they construct behavior explanations which are a fundamental tool of social cognition But Malle argues behavior explanations exist not only in the mind they are also overt verbal actions used for social purposes When people explain their own behavior or the behavior of others they are using the explanation to manage a social interaction by offering clarification trying to save face or casting blame Malle's account makes clear why these two aspects of behavior explanation exist and why they are closely linked along the way he illustrates the astonishingly sophisticated and subtle patterns of folk behavior explanations Malle begins by reviewing traditional attribution theories and their simplified

portrayal of behavior explanation A more realistic portrayal he argues must be grounded in the nature function and origins of the folk theory of mind the conceptual framework underlying people's grasp of human behavior and its connection to the mind Malle then presents a theory of behavior explanations focusing first on their conceptual structure and then on their psychological construction He applies this folk conceptual theory to a number of questions including the communicative functions of behavior explanations and the differences in explanations given for self and others as well as for individuals and groups Finally he highlights the strengths of the folk conceptual theory of explanation over traditional attribution theory and points to future research applications

Intentions in the Experience of Meaning Raymond W. Gibbs, 1999-09-13 What do our assumptions about authorship matter for our experience of meaning This book examines the debates in the humanities and social sciences over whether authorial intentions can or should constrain our interpretation of language and art Scholars assume that understanding of linguistic and artistic meaning should not be constrained by beliefs about authors and their possible intentions in creating a human artifact It is argued here that people are strongly disposed to infer intentionality when understanding oral speech written texts artworks and many other human actions Although ordinary people and scholars may infer meanings that diverge from or extend beyond what authors intend our experience of human artifacts as meaningful is fundamentally tied to our assumptions of intentionality This challenges the traditional ideas of intentions as existing solely in the minds of individuals and formulates a new conceptual framework for examining if and when intentions influence the interpretation of meaning

student achievement

How Our Love of Dogs Creates Social Conflict James K. Beggan, 2022-09-07 For the last twenty thousand years dogs and people have shared a unique bond in the animal kingdom In *How Our Love of Dogs Creates Social Conflict* James K Beggan uses symbolic interaction to examine the meaning that dogs have for people as friends and family members Although many animal rights advocates express dismay over the subordinate status ownership implies the author argues that ownership creates a powerful psychological connection that makes it easier for people to imbue dogs with humanlike characteristics Beggan outlines how dogs sensitivity to inequity in combination with a high degree of cognitive capacity makes it possible for dogs to be active agents in creating conflict between people The author s analysis of social conflict between people over their dogs connects to profound philosophical concepts about the nature of mind the relationship between humans and animals and the moral responsibility human beings have to dogs and other animals *The Oxford Handbook of Social Cognition, Second Edition* Donal E. Carlston, Kurt Hugenberg, Kerri L. Johnson, 2024 This revised edition overhauls the first edition with a majority of chapters reconceptualized focusing on offering a comprehensive review and a new multigenerational perspective The chapter also includes a multitude of new topics including gender identity intersectionality prejudice happiness and wellbeing questionnaire methodology and more

Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and suspenseful novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
