Person-Environment Practice Susan P. Kemp, James K. Whittaker, Elizabeth M. Tracy, 2024-11-01 *Person Environment Practice* addresses a core but long neglected dimension in social work and human services practice accurate environmental assessment and strategic environmental intervention Despite the centrality of person environment as a key construct in direct practice the domain of environmental assessment intervention has received relatively little systematic attention in the practice literature For a

variety of reasons the core focus of direct practice assessment and change strategies has centered more on person than environment. This book seeks to redress that imbalance. Ironically the relative lack of attention to environmentally oriented practice persists even as current demands of practice fall increasingly under the rubric of what we here call environmental intervention defined as both action in the environment and the process of transforming individual and collective perspectives through critical analysis of the impact of environmental conditions. The authors argue that the ability to understand environment from the client's perspective and to function effectively in the environmental domain is central to many emergent areas of practice such as practice with extended families and personal networks practice from a strengths perspective and culturally competent practice. In *Person Environment Practice* the authors offer a coherent critique and overview of environmental assessment and intervention congruent with the demands of both newly emerging and established interpersonal helping approaches within social work's domain. Robert Halpern of the Erikson Institute for Advanced Studies in Child Development described the book as as clear thoughtful and subtle a discussion of how to consider the environment in interpersonal helping as I have seen in the literature and Anthony Maluccio of Boston College called the book a timely and exciting contribution with appreciation and respect for social work practices and qualities of inspiration as well as intellectual stimulation. Susan P Kemp is assistant professor School of Social Work The University of Washington Seattle. James K Whittaker is professor School of Social Work The University of Washington Seattle. Elizabeth M Tracy is associate professor Mandel School of Applied Social Sciences Case Western Reserve University Cleveland Ohio.

Environmental Psychology Mirilia Bonnes, Gianfranco Secchiaroli, 1995-08-11 This textbook provides a clear and comprehensive introduction to the rapidly expanding field of environmental psychology. The authors start with a review of the history of environmental psychology highlighting its interdisciplinary nature. They trace its roots in architecture ecology and geography and examine the continuing relationship of these subjects to the psychological tradition. The book then moves through key contemporary lines of research in the field contrasting models from perception and cognition such as those of Gibson and Brunswick with major social psychological approaches as represented by Lewin Barker and others. The book concludes with an analysis of the most promising areas of research and practice.

successful research proposal Environmental Psychology Tony Cassidy, 2013-10-31 This text contains an up to date survey of theory research and practice in environmental psychology drawing on international literature It adopts the perspective that physical and social factors are inextricably linked in their influence on human behaviour and experience and that the world in which we live is changed and often damaged by human action Throughout the text the issues which are important in contemporary psychology such as levels of explanation methodological diversity and the relationship between psychology and other disciplines are brought to the fore The text covers established areas of environmental concern and also brings together research on rarely covered topics such as the effects of smell colour and light and the way in which physical environments influence social identity *Theoretical Perspectives in Environment-Behavior Research* Seymour Wapner, Jack Demick, C. Takiji Yamamoto, Hiroufmi Minami, 2012-12-06 Following upon the Handbook of Japan United States Environment Behavior Research published by Plenum in 1997 leading experts review the interrelationships among theory problem and method in environment behavior research The chapters focus on the philosophical and theoretical assumptions underlying current research and practice in the area and link those assumptions to specific substantive questions and methodologies

A Handbook of Theories on Designing Alignment Between People and the Office Environment Rianne Appel-Meulenbroek, Vitalija Danivska, 2021-06-16 Although workplace design and management are gaining more and more

attention from modern organizations workplace research is still very fragmented and spread across multiple disciplines in academia There are several books on the market related to workplaces facility management FM and corporate real estate management CREM disciplines but few open up a theoretical and practical discussion across multiple theories from different fields of studies Therefore workplace researchers are not aware of all the angles from which workplace management and effects of workplace design on employees has been or could be studied A lot of knowledge is lost between disciplines and sadly many insights do not reach workplace managers in practice Therefore this new book series is started by associate professor Rianne Appel Meulenbroek Eindhoven University of Technology the Netherlands and postdoc researcher Vitalija Danivska Aalto University Finland as editors published by Routledge It is titled Transdisciplinary Workplace Research and Management because it bundles important research insights from different disciplinary fields and shows its relevance for both academic workplace research and workplace management in practice The books will address the complexity of the transdisciplinary angle necessary to solve ongoing workplace related issues in practice such as knowledge worker productivity office use and more strategic workplace management In addition the editors work towards further collaboration and integration of the necessary disciplines for further development of the workplace field in research and in practice This book series is relevant for workplace experts both in academia and industry This first book in the series focuses on the employee as a user of the work environment The 21 theories discussed and applied to workplace design in this book address people's ability to do their job and thrive in relation to the office workplace Some focus more on explaining why people behave the way they do the psychosocial environment while others take the physical and or digital workplace quality as a starting point to explain employee outcomes such as health satisfaction and performance They all explain different aspects for achieving employee workplace alignment EWA and thereby ensuring employee thriving The final chapter describes a first step towards integrating these theories into an overall interdisciplinary framework for eventually developing a grand EWA theory The Open Access version of this book available at <http://www.taylorfrancis.com/books/e/9781003128830> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
