Personal Character Cultural Milieu:

Personal Character and Cultural Milieu Douglas Gilbert Haring,1949 **Personal Character and Cultural Milieu** Douglas Gilbert Haring,1966 Personal Character and Cultural Milieu Douglas Gilbert Haring,1948 , *Personal Character and Cultural Milieu* Haring , Haring,1956-10-25 *Privacy: Studies in Social and Cultural History* Barrington Moore, Jr,2017-07-28 This title was first published in 1984 Focusing on Brazil this text covers issues such as the legacy of colour social realities and diversions and assertive behaviour *Morality and Cultural Differences* John W. Cook,1999 Carefully examining the arguments for and against moral relativism Cook exposes not only that anthropologists have failed in their attempt to support relativism with evidence of cultural differences but that moral absolutists have been equally unsuccessful in their attempts to refute it He argues that these conflicting positions are both guilty of an artificial and unrealistic view of morality Cook undertakes to show that a more subtle and complex account of morality reveals that moral relativism and moral absolutism must both be rejected A pathbreaking book *Morality and Cultural Differences* deftly illustrates how philosophy when patiently pursued can be relevant to our everyday concerns This accessible and cogent work is an ideal text for beginning and advanced students of ethics philosophy and anthropology Anyone interested in the debate surrounding cultural relativism will find it to be engaging reading **Culture Based Development** Annie Tubadji,2025-07-15 Introducing the founding principles of the novel paradigm Culture Based Development CBD Annie Tubadji presents a structured explanation of why people love and hate why people act in the way that they do and how this ultimately impacts the entire economy **Japan and Korea** Frank Joseph Shulman,2013-10-23 First Published in 1971 This annotated bibliography of doctoral dissertations on Japan and Korea grew out of a decision to expand and bring up to date an earlier list entitled Unpublished Doctoral Dissertations Relating to Japan Accepted in the Universities of Australia Canada Great Britain and the United States 1946 1963 compiled by Peter Cornwall and issued by the Center for Japanese Studies in 1965 *Preventive Strategies on Suicide* Diekstra,Gulbinat,Kienhorst,Leo,2023-07-31 Recent estimates by The World Health Organisation and The World Bank indicate that throughout the world each and every year more than 800 000 persons die as a consequence of suicide This means that the death toll of suicide equals and in many countries even exceeds that of road traffic accidents In addition to the number of suicidal deaths at least ten times as many persons make non fatal attempts to take their lives or harm themselves often seriously enough to require medical attention and not infrequently resulting in irreversible disability But still these figures inadequately describe the magnitude of human loss and suffering caused by suicide If one assumes that for every suicidal death there are at least five persons whose lives are profoundly and often for many years affected by the event emotionally socially and economically by the event then each year millions of survivor victims are added to the tens of millions already out there Hence suicide is an ever recurring catastrophe of the first degree It is not a phenomenon that first and foremost forms a dubious privilege of the so called highly developed countries Suicide

also occurs in the developing countries and there is more than suggestive evidence that in several of these countries the suicide rate equals or even surpasses the highest national rates shown by official statistics. It follows that suicide is an extremely important public health problem. It is however a problem that is painfully neglected. Throughout the world resources devoted to the prevention of suicide are only a tiny fraction of those devoted to the prevention of comparable problems such as road traffic accidents or to problems of lesser magnitude at least in the industrialized countries such as HIV infection and Aids. This volume produced under the supervision and auspices of the World Health Organization brings together for the first time information on epidemiological, clinical and preventive intervention aspects regarding suicide that have global significance and applicability. After a detailed description of the epidemiology of suicide and suicidal behaviour on an international scale, a large part of the book is devoted to the how to's of developing and organizing suicide prevention programs and services in different national and cultural settings both at clinical and community level. In addition, a wealth of practical information for health care workers and volunteers is provided on how to evaluate and deal with acute suicide risk. Examples of successful preventive intervention programs and projects from the developed as well as the developing world are provided. Legal and ethical problems involved in suicide prevention are also discussed. Finally, both cultural and biological aspects of suicidal behaviour as well as their clinical practice relevance are examined.

Japan's New Middle Class Ezra F. Vogel, 2013-07-18. This classic study on the sociology of Japan remains the only in-depth treatment of the Japanese middle class. Now in a fiftieth anniversary edition that includes a new foreword by William W. Kelly, this seminal work paints a rich and complex picture of the life of the salaryman and his family. In 1958, Suzanne and Ezra Vogel embedded themselves in a Tokyo suburb, living among and interviewing six middle-class families regularly for a year. Tracing the rapid postwar economic growth that led to hiring large numbers of workers who were provided lifelong employment, the authors show how this phenomenon led to a new social class: the salaried men and their families. It was a well-educated group that prepared their children rigorously for the same successful corporate or government jobs they held. Secure employment and a rising standard of living enabled this new middle class to set the dominant pattern of social life that influenced even those who could not share it, a pattern that remains fundamental to Japanese society today.

Theology in the Context of World Christianity Timothy C. Tennent, 2009-05-26 Thinking more globally about the formation of theology enriches our understanding of what it means to be a Christian It is no secret that the center of Christianity has shifted from the West to the global South and East While the truths of the Christian faith are universal different contexts and cultures illuminate new questions understandings and expressions What does this mean for theology as Western theologians understand it Timothy Tennent argues that the Christian faith is culturally and theologically translatable Theology in the Context of World Christianity is written to expand our ecclesiastical cartography by highlighting within each of the major themes of systematic theology studies that are engaging the global church such as Anthropology with studies drawn from the different views of human identity between Eastern and Western cultures Christology with a focus on the emphases that African Christians place on the characteristics of Christ Pneumatology by looking at the role of the Holy Spirit in Latin American Pentecostalism Eschatology by focusing on how this branch of theology shapes world missions and evangelism Each of the ten chapters examines traditional theological categories in conversation with theologians from across the globe making this volume valuable for students pastors missionaries and theologians alike Theological reflection is active and exciting in the majority world church and Tennent invites you to your own reflection and celebration of Christ's global church These are perspectives that should be heard considered and brought into conversation with Western theologians Global theology can make us aware of our own blind spots and biases and has much to offer toward the revitalization of Western Christianity

Grandparents in Cultural Context David W. Shwalb, Ziarat Hossain, 2017-07-20 Grandparents in

Cultural Context gives a long overdue global view of the changing roles of grandparents. The eleven main chapters are by experts in the Americas, Europe, and Russia, Asia, and Africa, and the Middle East, and the editors integrate their chapters with previous writings on grandparenthood. Rather than technical or statistical research reports, each chapter provides a thought-provoking and comprehensive review of research, real-life case stories, cultural influences, and applied implications for grandparenthood across and within societies. Calling special attention to the roles of grandfathers and grandparenthood in societies previously unrepresented in the literature, it provides several hundred new citations of work previously unavailable in English-language publications. Accessible to both scholars and students, it has several pedagogical features, e.g., web links, discussion questions, that make it useful as a text for upper-division undergraduate or graduate-level classes in behavioral, social, and family sciences. It is relevant to psychology, gerontology, family studies, anthropology, family comparative sociology, education, social work, gender studies, ethnic studies, psychiatry, and diversity and international studies programs. Practitioners, service providers, policymakers, and internationally minded grandparents will also enjoy this book. **Globalized**
