This extensively revised fourteenth edition incorporates the major changes to planning introduced by the 2004 Planning and Compulsory Purchase Act and the government's mission to change the culture of planning. It provides a critical discussion of the system of planning, the institutions involved, the plans and other instruments that are used, the procedures for controlling development and land use change, and the mechanisms for implementing policy and proposals. It reviews current policy for sustainable development, housing, and the Sustainable Communities Plan, the Barker Review, urban renewal and regeneration, the renaissance of city and town centres, the countryside, transport, and the heritage. Contemporary arrangements are explained with reference to their historical development, the influence of the European Union, the Labour government, and changing social and economic demands for land use change. Detailed consideration is given to the nature of planning and its historical evolution, policies for managing urban growth and delivering housing, sustainable development principles for planning social and economic development of the countryside, conserving the heritage, changes to the profession and education of planners. Special attention is given to the objective of improving the co-ordination of government policies through the spatial planning approach. The many recent changes to the system are explained in detail, and each chapter ends with notes on further reading, lists of official publications, and an extensive bibliography, all of which enhance its reputation as the bible of British Planning. *Catalog of Copyright Entries. Travelers and traders taking the Santa Fe Trail's routes from Missouri to New Mexico wrote vivid eyewitness accounts of the diverse and abundant wildlife encountered as they crossed arid plains high desert and rugged mountains Most astonishing to these observers were the incredible numbers of animals many they had not seen before buffalo antelope pronghorn prairie dogs roadrunners mustangs grizzlies and others They also wrote about the domesticated animals they brought with them including oxen mules horses and dogs Their letters diaries and memoirs open a window onto an animal world on the plains seen by few people other than the Plains Indians who had lived there for thousands of years Phyllis S Morgan has gleaned accounts from numerous primary sources and assembled them into a delightfully informative narrative She has also explored the lives of the various species and in this book tells about their behaviors and characteristics the social relations within and between species their relationships with humans and their contributions to the environment and humankind With skillful prose and a keen eye for a priceless tale Morgan reanimates the story of life on the Santa Fe Trail's well worn routes and its sometimes violent intersection with human life She provides a stirring view of the land and of the animals visible as far as the eye could reach as more than one memoirist described She also champions the many contributions animals made to the Trail's success and to the opening of the American West *Country Life*, 1907
