

On rights-based approaches to justice for animals

Abstract. In the following paper I critically review and compare Robert Garner's recent rights-based approach to justice for animals with competing accounts by Martha Nussbaum focused on individual capabilities and species norms, and by Sue Donaldson and Will Kymlicka focused on citizenship theory. What does it mean to say that the status and treatment of animals is an issue of justice and why must this feature in a theory of (global) justice that is meant to contribute to the solution of urgent practical problems? I take the question of whether animals place significant moral demands on us as settled in the affirmative. I argue that animal rights are a matter of justice that must be covered by any substantive theory of global justice. In light of my critical survey of these innovative new political theories of animal rights I ask how animals might be included in global justice theory and how their inclusion might significantly enrich and inform global politics.

The International Legal Protection of Persons in Humanitarian Crises Dug Cubie, 2017-04-20 The instinctual desire to support those in need irrespective of geographic cultural or religious links is both facilitated and overwhelmed by

the extent of information now available about the multiple humanitarian crises which occur on a daily basis around the world. Behind the images of devastating floods and earthquakes or massive forced displacements resulting from armed conflicts is the all too real suffering faced by individuals and families. From the 2004 Indian Ocean Tsunami to the on going conflict in Syria recent years have seen an increasing debate regarding the international legal mechanisms to protect persons in such humanitarian crises. The International Legal Protection of Persons in Humanitarian Crises argues that an *acquis humanitaire* is identifiable through the interconnected web of existing and emerging international, regional and national laws, policies and practices for the protection of persons caught up in humanitarian crises. Indeed the humanitarian imperative to alleviate suffering wherever it may be found permeates various branches of international law and is reflected in the extensive humanitarian activities undertaken by States and other actors in times of armed conflict, population displacement and disaster. Dug Cubie argues that by clarifying the conceptual framework and normative content of the *acquis humanitaire*, gaps and lacunae can be identified and the overall protection of persons strengthened.

International Covenant on the Right to Development, 2025-08-04

In this pioneer compilation of academic literature on the International Covenant on the Right to Development, including some of the leading experts on the subject, the authors delve at length into the central enquiry on how and to what extent the Covenant will, as a binding instrument of international law, shape the global balance of power. Envisaged to be incorporated in the international bill of human rights, the analysis on the various component elements leads to the conclusive argument that once in force the Covenant on the Right to Development will have major implications for how the international order is structured and how development is henceforth pursued.
