Tree-ring Dating and Archaeology M.G.L. Baillie, 2014-10-24 The analysis of tree ring patterns or dendrochronology is a very exact science and an important dating technique The basis of the method is misleadingly simple that overlap of successive older ring patterns can generate a master chronology and samples of unknown age can then be checked against this This book published originally in 1982 traces the development of a specific project from its inception to the successful completion of some of the longest chronologies in Europe In doing so it looks at some of the problems associated with the subject and at the levels of precision possible After outlining the techniques associated with the measurement and processing of tree ring patterns the author traces an attempt to construct such an independent chronology in a new area The book breaks naturally into sections conditioned by the availability of timbers and these can be listed as modern late medieval medieval early medieval and prehistoric As far as possible the results are presented in the order in which things happened thus preserving the sense of a developing subject

The Iron Age in Northern Britain Dennis W. Harding, 2004-08-26 The Iron Age in Northern Britain examines the impact of the Roman expansion northwards and the native response to the Roman occupation on both sides of the frontiers It traces the emergence of historically recorded communities in the post Roman period and looks at the clash of cultures between Celts and Romans Picts and Scots Northern Britain has too often been seen as peripheral to a core located in south eastern England Unlike the Iron Age in southern

Britain the story of which can be conveniently terminated with the Roman conquest the Iron Age in northern Britain has no such horizon to mark its end The Roman presence in southern and eastern Scotland was militarily intermittent and left untouched large tracts of Atlantic Scotland for which there is a rich legacy of Iron Age settlement continuing from the mid first millennium BC to the period of Norse settlement in the late first millennium AD Here D W Harding shows that northern Britain was not peripheral in the Iron Age it simply belonged to an Atlantic European mainstream different from southern England and its immediate continental neighbours
