Rings Discoveries From Galileo To Voyager:

Rings James Elliot, Richard Kerr, 1984 Rings recounts one of the most fascinating stories to emerge from our recent exploration of the solar system **Planetary Ring Systems** Ellis D. Miner, Randi R. Wessen, Jeffrey N. Cuzzi, 2007-12-03 This is the most comprehensive and up to date book on the topic of planetary rings systems yet written The book is written in a style and at a language level easily accessible to the interested non expert The authors cover the scientific significance of ring studies the history of their discovery and characterization the observations of Pioneer 10 at Jupiter Pioneer 11 and Voyager 1 at Jupiter and Saturn Voyager 2 at all four giant planets of the solar system and Galileo at Jupiter Each chapter includes extensive notes references figures and tables A bibliography is included at the end of each chapter **Galileo's Daughter** Dava Sobel, 2009-05-26 Inspired by a long fascination with Galileo and by the remarkable surviving letters of Galileo's daughter a cloistered nun Dava Sobel has written a biography unlike any other of the man Albert Einstein called the father of modern physics indeed of modern science altogether Galileo's Daughter also presents a stunning portrait of a person hitherto lost to history described by her father as a woman of exquisite mind singular goodness and most tenderly attached to me Galileo's Daughter dramatically recolors the personality and accomplishment of a mythic figure whose seventeenth century clash with Catholic doctrine continues to define the schism between science and religion Moving between Galileo's grand public life and Maria Celeste's sequestered world Sobel illuminates the Florence of the Medicis and the papal court in Rome during the pivotal era when humanity's perception of its place in the cosmos was about to be overturned In that same time while the bubonic plague wreaked its terrible devastation and the Thirty Years War tipped fortunes across Europe one man sought to reconcile the Heaven he revered as a good Catholic with the heavens he revealed through his telescope With all the human drama and scientific adventure that distinguished Dava Sobel's previous book Longitude Galileo's Daughter is an unforgettable story **Time-variable Phenomena in the Jovian System** M. J. S. Belton, Robert A. West, Jürgen Rahe, 1989 **Interplanetary Dust** Eberhard Grün, Bo A.S. Gustafson, Stan. Dermott, Hugo Fechtig, 2012-12-06 Conceived more than six years ago this book took much effort to develop and several updates in parts of the book became necessary because significant advances in the field of Interplanetary Dust had occurred Now at the beginning of the new millennium this book provides up to date coverage of all major aspects of dust in the Solar System The volume is conceived as a source book for researchers in the field as well as a graduate level textbook In order to achieve the highest standard the individual chapters are written by experts in the field preserving the somewhat different style and language of the sub topic The book follows the comprehensive review of the Cosmic Dust field assembled by Tony McDonnell more than 20 years ago That book covered dust in its various physical appearances as the common theme but it described phenomena that appeared rather unrelated The topics ranged from zodiacal light over lunar craters to dust particles collected in the atmosphere from interstellar dust to comets and from dust dynamics to laboratory simulation of dusty
