| Seckel                                                                            |                                                                                   |   |   |   |   |   |   |   |                                                                                     |                                                                                     |                                                                                     |                                                                                     |
| Forelle                                                                           |                                                                                   |  |  |  |  |  |  |  |                                                                                     |                                                                                     |                                                                                     |                                                                                     |

 Pears are one of the few fruits that do not fully ripen on the tree; they are harvested when they are fully mature but before they are ripe.

 To speed ripening, keep pears out of the cooler. After pears are ripe, place in the cooler to slow further ripening.

 Pears come in many shapes, sizes, and colors, each with a different flavor and texture profile.

 Other than Bartlett pears, most varieties do not dramatically change color as they ripen. Since pears ripen from the inside out, check for ripeness by gently pressing near the neck or stem. When it yields to gentle pressure it is ripe.
