Rediscovering Russia in Asia Stephen Kotkin, David Wolff, 2015-03-04 This work presents a trans-Siberian expedition to rediscover the peoples, cultures and riches of Russia's eastern frontiers. It addresses such questions as: who are the people of the region? Have they a distinct culture? And does the area have a future as part of the Pacific Rim?

Asia's Rise in the 21st Century Scott B. MacDonald, Jonathan Lemco, 2011-10-20 This expert analysis looks at what the increasing economic and political prominence of China and other Asian nations means to the West and the rest of the world. Asia's Rise in the 21st Century is a wake up call to the West offering a sophisticated assessment of a group of nations that are becoming essential markets for U.S. trade, industry and finance even as they increasingly represent fierce competition for global markets. The work traces changes that launched the region down the path to potential economic and political ascendancy and it looks at various factors from politics to economics to demographics that affect Asia now and will continue to do so in the future. China's prominence is explored in the context of how it complements and competes with the rest of Asia especially Japan and India and how it interacts with other major emerging market countries such as Brazil, Russia and Turkey. The book also looks at the challenge China's ascendancy poses to the assertion that a successful capitalist system must be accompanied by political democracy. Finally the authors suggest ways in which Asia's rise can be accommodated in the West and elsewhere and offer thoughts on where Asia and especially China will be in 2030.

Perspectives for a European Security Strategy Towards Asia Gustaaf Geeraerts, 2011 As the geopolitical point of gravity moves to the east the European Union (EU) faces the challenge of ongoing global power shifts and this study addresses the options, opportunities and obstacles that lie ahead as the EU becomes a security actor in Asia and Africa. Contributors address a number of key issues including the EU's soft power, overall strategic planning, European interests in Asia and the role of Russia in Asia's security climate.

Regional Economic Outlook, October 2014, Middle East and Central Asia, International Monetary Fund. Middle East and Central Asia Dept., 2014-10-27 This issue discusses economic developments in the Middle East, North Africa, Afghanistan and Pakistan (MENAP) which continue to reflect the diversity of conditions prevailing across the region. Most high income oil exporters primarily in the GCC continue to record steady growth and solid economic and financial fundamentals albeit with medium term challenges that need to be addressed. In contrast other countries (Iraq, Libya and Syria) are mired in conflicts with not only humanitarian but also economic consequences. And yet other countries (mostly oil importers) are making continued but uneven progress in advancing their

economic agendas often in tandem with political transitions and amidst difficult social conditions In most of these countries without extensive economic and structural reforms economic prospects for the medium term remain insufficient to reduce high unemployment and improve living standards **China's Rise, Russia's Fall** Peter Nolan,1995-10-30 A lively and well written comparison of economic transformation in China and the USSR Russia combining a good knowledge of the Chinese economy with a radical critique of Western transition orthodoxy this very topical and very controversial book will be useful reading for students administrators in many countries and international agencies and business people Michael Ellman University of Amsterdam Peter Nolan makes a pungent challenge to conventional wisdom by arguing that the Chinese approach to system reform has been vastly more successful than the shock therapy applied to Russia His book is based on extensive comparison and deep insight into the political economy of both countries John Teye Institute of Development Studies Sussex This book is the first attempt to analyse systematically the dramatic contrast in the results of post Stalinist reform in China and Russia It argues that there emerged a transition orthodoxy about how to reform the communist systems of political economy However it was deeply flawed The advice which flowed from this orthodoxy was the primary cause of the Soviet disaster The decision not to follow it was the main reason for China s enormous success in its reform programme
