

Risk Herons

Clifford Lane

Risk Herons:

Herons, Egrets and Bitterns Neil McKilligan, 2005 This is the first book to deal exclusively with the Australian members of the Family Ardeidae It is an easy to read account of their origins classification and biology and explains the features that distinguish them from other birds This book covers the distribution and movements feeding breeding population dynamics and conservation of the 14 Australian species Also includes a chapter on the six species that are occasional visitors to the continent

The Great Blue Heron Robert William Butler, 1997 With its striking plumage the great blue heron is one of the most widely recognized wading birds in North America Riding on kelp beds in the Queen Charlotte Islands wading in coastal streams along the mainland poised motionless at the water's edge on a misty morning or nesting in the limbs of old growth forests this stately bird is a familiar sight on the coast of British Columbia The largest colonies are on the Fraser River delta an area of great ecological significance to the north Pacific Despite a growing body of knowledge regarding many aspects of the species breeding biology and courtship behaviour the foraging and population ecology of this bird remains something of an enigma In his beautifully illustrated book Robert Butler follows the great blue heron through a year on the coast of British Columbia He draws on more than a decade of work to throw light on the adaptability of this magnificent bird to a temperate climate its diet and breeding habits habitat use and conservation Although the great blue heron has become a symbol of wetland conservation in recent years it has had to face new challenges as a consequence of rapid urbanization of its environment In *The Great Blue Heron* the author also describes the B C coast and shares a vision for the conservation of the Strait of Georgia and the Fraser River delta

Coastal and Estuarine Risk Assessment Jr., Morris H. Roberts, Robert C. Hale, 2001-09-18 Written by experts in the field *Coastal and Estuarine Risk Assessment* explores the science of exposure effect and risk This is the first book to address the application of the current risk assessment paradigm from the National Research Council to coastal and estuarine environments It provides the necessary applications for modifying the paradigm and shows how to use it to perform an effective assessment Topics include fate and bioavailability of organic compounds emerging contaminants effects of populations effects to marine mammals risk from multiple stressors European approaches to risk assessment effects of land use and more

The Herons Handbook James Hancock, James A. Kushlan, 2010-09-30 Everything you ever wanted to know about the world's herons This book on herons and bitterns is an authoritative summary of what is currently known about this diverse and fascinating worldwide family of wading birds It is the result of extensive studies carried out over many years by its distinguished authors on both sides of the Atlantic The plumages feeding and breeding behaviour and ecology of each of the recognised species is illustrated in full colour with paintings meticulously researched by Robert Gilman and Peter Hayman A distribution map based on the latest available information also shows the range of each species Because of the widening interest in wading birds considerable attention is paid to identification in the field Four identification plates especially prepared by Robert Gillmor show all the plumages in each stage of every species

and race of white herons and egrets This information invaluable for ornithologists and birdwatchers has never before been brought together in one volume References to all the relevant literature on herons and bitterns is included for those who want to make a deeper study of these birds and the authors have contributed their own considerable experiences gained in the field The definitive handbook on herons this book will not only provide the basis for future research and conservation but will also be a source of interest and enjoyment for both birdwatchers and ornithologists

Lower Valley Transmission Project (ID, WY) ,1998

The Herons of Europe Claire Voisin,2010-10-30 Although the majority of the world s Herons live in the tropics and subtropics Europe is home to nine species some large some small some colonial some solitary breeders Highly specialized birds they exhibit many interesting differences in their behaviour and ecology and are a favourite group for many ornithologists Voisin begins her book with a general description of the family before going on to treat each species in more detail The species accounts summarize such topics as field characters distribution population size breeding and feeding ecology and behaviour Numerous figures and tables are accompanied by fine drawings of behaviour by P L Suiro and colour and black and white pictures of each species by Gunnar Brusewitz

The Spectator ,1902 A weekly review of politics literature theology and art

Living on the Edge Le Zwarts,Rob G. Bijlsma,Jan van der Kamp,Eddy Wymenga,2016-10-18 *Living on the Edge* examines the function of the Sahel region of Africa as an important wintering area for long distance migrant birds It describes the challenges the birds have to cope with climate change of course and rapid man made habitat changes related to deforestation irrigation and reclamation of wetlands How have all these changes affected the birds and have birds adapted to these changes Can we explain the changing numbers of breeding birds in Europe by changes in the Sahel or vice versa Winner of the BB BTO Best Bird Book Award 2010 The Jury commented It is a tremendous book in every department It marks a step change in our knowledge of the ecology of this critically important region in the European African migration system and of the many species familiar to us on their breeding grounds that winter there The authors combine the latest scientific information with vivid descriptions of landscapes and animals Their book is richly illustrated with large numbers of drawings maps and photographs by acclaimed experts The wealth of coloured graphics has been particularly well thought out and encourages readers to delve into the figures and learn more about the region rather than having the all too common opposite effect Summing up the jury praises not just the high quality of the texts the information and the illustrations but also the sheer pleasure of reading the book One of the key attributes of a good book is to be able to grip the reader s attention and transport him or her to another place We feel confident that *Living on the edge* will have that effect
