Smoking W. Kip Viscusi, 1992 Are the risks of smoking exaggerated Has there been an open and rational discussion about the risks of smoking This book attempts to answer these and many other questions about the subject providing a detailed empirical presentation on smoking behavior as a risky consumer decision Using new empirical data based on several national and regional surveys Viscusi addresses a number of important issues including the sources of information that people have about the risks of smoking the accuracy of their perceptions of the risks associated with smoking and the consistency of smoking decisions with other risky behavior scrutinizing issues such as whether smokers value risk differently than those who wear safety belts Viscusi also looks at the differences in age groups and how they assess these risks based on public information He provides new insight into the degree to which individuals understand smoking risks and take these risks into account in their behavior With its detailed empirical data and its examination of individual decision making processes this work will interest researchers in public health public policy psychology and economics as well as anyone concerned with this important issue

New Risks: Issues and Management Louis A. Cox, Paolo F. Ricci, 2013-06-29 This volume contains the proceedings of the 1986 annual meeting and conference of the Society for Risk Analysis It provides a detailed view of both mature disciplines and emerging areas within the fields of health safety and environmental risk analysis as they existed in

1986 In selecting and organizing topics for this conference we sought both i to identify and include new ideas and application areas that would be of lasting interest to risk analysts and to users of risk analysis results and ii to include innovative methods and applications in established areas of risk analysis In the three years since the conference many of the topics presented there for the first time to a broad risk analysis audience have become well developed and sometimes hotly debated areas of applied risk research Several such as the public health hazards from indoor air pollutants radon in the home high voltage electric fields and the AIDS epidemic have been the subjects of headlines since 1986 Older areas such as hazardous waste site ranking and remediation air emissions dispersion modeling and exposure assessment transportation safety seismic and nuclear risk assessment and occupational safety in the chemical industry have continued to receive new treatments and to benefit from advances in quantitative risk assessment methods as documented in the theoretical and methodological papers in this volume A theme of the meeting was the importance of new technologies and the new and uncertain risks that they create

Liability Robert E. Litan,Clifford Winston,2010-12-01 The United States has recently witnessed an explosion of personal injury lawsuits involving medical malpractice unsafe products and widespread environmental hazards Jury awards and out of court settlements have escalated in many cases to hundreds of thousands of dollars At the same time premiums for liability insurance have skyrocketed As a result physicians have cut back services and some municipalities and businesses have been denied liability coverage altogether Some experts claim that only fundamental reform of the nation s civil justice system will end this insurance crisis But critics of such wholesale judicial reform contend that the insurance industry has launched a tort reform campaign to cover its own past underwriting mistakes Liability brings together economists and experts in liability law and the insurance industry to assess the merits of the conflicting positions and to formulate sound public policy Led by Robert Litan and Clifford Winston the contributors describe the major changes that have contributed to the insurance crunch and set forth a methodological framework for evaluating the debate over the current liability system They conclude that increases in premiums and cutbacks in coverage have been real but selective that the forces in the judicial system responsible for rising liability costs are not readily subject to change and that we know too little about the cost and benefits of the current tort system to replace it with an alternative compensation program

Workers' Compensation Morley Gunderson,Douglas Hyatt,2000-01-01 Topics covered include low back pain in workers compensation payroll taxes unfunded liabilities occupational health and safety private participation the cost appeals litigation

Public Economics in the United States Steven Payson,2014-06-11 This comprehensive explanation of the U S government s role in economics will be an eye opener for anyone who wants to understand exactly what the government does and doesn t do in this most critical area Most people including many economists are not aware of the great variety of crucial tasks and invaluable analyses undertaken by government economists This three volume set will fill

that gap with an all encompassing overview of the major economics related work the government performs across all of its agencies and offices With 45 chapters written by 61 leading experts the work covers every major topic in government economics including such diverse areas as monetary policy defense spending social assistance international trade antitrust and environmental protection In addition to entries by those who teach economics the compendium also features candid observations from government insiders to help readers grasp how things really work But readers will not only gain insight into specific fields and topics they will also be able to better understand the big picture and how its pieces fit together This unique and far reaching set often challenges conventional wisdom even as it presents a novel synthesis of the government s research analysis and actions
