Imposing Risk John Oberdiek,2017-09-08 We subject others and are ourselves subjected to risk all the time risk permeates life Despite the ubiquity of risk and its imposition philosophers and legal scholars have devoted little of their attention to the difficult questions stimulated by the pervasiveness of risk When we impose risk upon others what is it that we are doing What is risking s moral significance What moral standards govern the imposition of risk And how should the law respond to it This book highlights these important but neglected questions and offers novel answers to them in a systematic way constructing a normative framework of risk imposition that draws upon a wide range of insights from diverse sources within philosophy and legal theory Oxford Legal Philosophy publishes the best new work in philosophically oriented legal theory It commissions and solicits monographs in all branches of the subject including works on philosophical issues in all areas of public and private law and in the national transnational and international realms studies of the nature of law legal institutions and legal reasoning treatments of problems in political morality as they bear on law and explorations in the nature and development of legal philosophy itself The series represents diverse traditions of thought but always with an emphasis on rigour and originality It sets the standard in contemporary jurisprudence
