*The House of Rothschild in Spain, 1812-1941* Miguel A. López-Morell, 2016-03-09 Amongst the serried ranks of capitalists who drove European industrialisation in the nineteenth century the Rothschilds were amongst the most dynamic and the most successful Establishing businesses in Germany Britain France Austria and Italy the family soon became leading financiers bankrolling a host of private and government businesses ventures In so doing they played a major role in fuelling economic and industrial development across Europe providing capital for major projects particularly in the mining and railway sectors Nowhere was this more apparent than in Spain where for more than a century the House of Rothschild was one of the primary motors of Spanish economic development Yet despite the undoubted importance of the Rothschild s role questions still remain regarding the actual impact of these financial activities and the effect they had on financial sectors companies and Spanish markets It is to such questions that this book turns its attention utilising a host of archive sources in Britain France and Spain to fully analyse the investments and financial activities carried out by the Rothschild House in Spain during the nineteenth and early twentieth centuries In so doing the book tackles a variety of interrelated issues Firstly fixing the period when the main capital entries sprung from the initiatives taken by the Rothschild family how consequential they really were and the sectors they affected Secondly quantifying the importance of these investments and financial activities and the

weight they had on financial sectors companies and Spanish markets as well as in foreign investment in each period Thirdly outlining the steps followed and means used by the Rothschild House in order to achieve the success in each of their businesses Finally analysing the consequences of this phenomenon in the actual growth of Spanish contemporary economy both in a general and in a partial scale By exploring these crucial questions not only do we learn much more about the working of one of the leading financial institutions and the development of the Spanish economy but a greater understanding of the broader impact of international finance and the flow of capital in the nineteenth century is achieved **Founder: A**

Klooz,2023-11-15 This book is a short description of how Zionist zealots have planned and implemented messianic protocols since 3 000 BCE by writing a bible that stole creation myths from the Babylonian Enuma Elish and the Egyptian Book of the Dead and by stealing the sacred stones of the Egyptian Ark of the Great Pyramid under the leadership of Akhenaten Moses and fleeing to Palestine where they once again took over the land occupied by the Canaanites and called it Israel Archeologic and genetic data support that both Jews and Palestinians came from ancient Canaanites who extensively mixed with Egyptians Mesopotamian and Anatolian peoples in ancient times Thus Palestinian Jewish rivalry is based solely on cultural and religious but not in genetic differences Does anyone really believe that the storm God El then Baal then combined with Yahweh wrote the bible and decided that Jews would be the chosen people Since the Spring of 2020 when mandated Covid 19 vaccines began excess deaths have increased dramatically across the globe to about 20% while unknown causes of death have increased significantly The numerous lockdowns stay at home of the workforce fear campaigns COVID 19 policy mandates imposed on approximately 193 member states of the United Nations have also contributed to undermining and destabilizing the very fabric of civil society and its institutions including education culture and the arts social gatherings sports entertainment all public sector activities including physical and social infrastructure social services law enforcement all major private sector activities which characterize national regional and local economies including small medium and large corporate enterprises family farms industry wholesale and retail trade the urban services economy transport companies airlines hotel chains the structures of the global economy including international commodity trade investment import and export relations between countries while the entire landscape of the global economy has been shattered Each culture has a Creation Myth that is contained in their own understanding of those cataclysm events that occurred between 10 500 BCE and 685 BCE The West has primarily used the myth in the Judeo Christian bible However you would think in the year 2020 people would understand that the bible is fiction and has significant reasons for concern such as the following the similarities of stories obvious rehashing of numerous previous character unavoidable contradictions significant moral problems including rape murder and incest and an abundance of nagging questions Unless you are mindless one can easily understand that a book like this can be used mainly for control but in some hands it can be used to create a self fulfilling prophecy The Bible Is Really the Story of Creation of the Solar System The Bible was initially stories that were written down and cobbled together and tales told verbally by their descendants over thousands of years that tried to explain the birth of the present Solar System and what the survivors witnessed It began in about 10 500 BCE and ended about 685 BCE Millions of years ago our Earth and was created by an expulsion of plasma from its brown dwarf star now known as the Planet Saturn Mars was also created from a plasma expulsion from the brown dwarf when it came under electrical stress in the plasma Universe Saturn as a brown dwarf with the Earth and Mars within its plasma glow mode had an atmosphere of salt hydrocarbons and water that misted down on both planets for millions or billions of years providing its oceans and oil pockets Brown dwarfs are known to

be the best home for the development of life since the glow mode provides one warm temperature with no seasons and promotes growth under its ultraviolet and infrared atmosphere It has recently been discovered that Saturn is the only planet with the same molecular type of water as Earth Our Earth does not wobble around its pole as is currently believed every 25 920 years due to solar lunar forces acting on the Earth It was known long ago by the Ancients that the so called change in some stars precessing against the sky was caused by the path of our sun and planets and other stars travelling and revolving around electric Birkeland Current filaments that circle around certain stars the star Arcturus the star Alcyone and the star Sirius The revolution of our current Sun with Sirius occurs every 25 000 years with the Arcturus filament stream every 550 000 years and with Alcyone and the Pleiades star system every 26 27 million years This last cycle is important since it corresponds to the same 26 27 million year extinction cycle of our Earth It is believed that Earth's extinction level events occurred as the Saturnian System with Earth and Mars within its orbit crossed the position of our current Sun and its planets every 26 27 million years resulting in the mass extinctions The biology of Earth is such a complete accident and so utterly unlikely that it will probably not have ever been duplicated anywhere at anytime among the billions of other star systems But here on Earth all of it especially the rise of complex species since the Cambrian 560 million years ago can be attributed to a series of cataclysmic plasma strikes by Saturn each of a very long duration biologists claim 10 000 years for the extinction events At about 10 500 BCE the Earth at that time a planet of the Sun made an electric field contact with Saturn causing 1500 years of darkness on Earth The period of darkness is recognized by many of the world's creation myths and was recorded in the illustrated graphic books of Mesoamerica references to which are made in the Colonial period documents Climatologically the period is identified today as the Younger Dryas when for some 1500 years Earth got as cold as it had ever been Over the next 7000 years the orbit of Earth apparently equal to the orbit of Saturn at that time but below Saturn progressively moved laterally to have the Earth's orbital path eventually travel below the centre of Saturn Thus between 10 500 BCE and 3147 BCE earth was part of a strange configuration of stacked planets a condition which provided long summers and a mild climate in the northern hemisphere Planets dominated by the giant form of Saturn stood above the north horizon and close to Earth but measured in millions of miles and were taken by humans to be the Gods who supported them and for whose benefit they labored at agriculture and conducted trade In 4070 BCE Saturn dropped its coma This had been the chaos before creation which had lasted some 7 000 years and had obscured Saturn and its companion satellites Saturn went Nova and switched to arc mode In a mass expulsion Saturn produced its rings and a new satellite Venus Saturn lit up more brilliantly than the Sun For humans of Earth who had not clearly seen the real Sun for thousands of years because of the shadow of the Younger Dryas followed by the obscurity of the enclosing plasmasphere of Saturn this was the creation the start of time and the first showing of the land and its resident Gods the satellites of Saturn Saturn was universally called the Sun throughout the world at this time In 3147 BCE as Mars began to oscillate between Venus and Earth this configuration

of standing planets became unstable and broke apart with the three large planets moving away from the Sun while Earth Venus and Mars were released to their overlapping inner orbits The breakup produced a stupendous flood waters which had been held at the south polar region due to gravitational attraction of Saturn for some 7 000 years The water held at the South Pole was due to the lifting up of the Earth s crust in the Arctic and the sinking toward the Earth s interior in Antarctica This was the end of the Golden Age When the Solar System re arrangent was complete it formed the basis of all religions myths and mystery schools

*A Century of Banking Consolidation in Europe* Manfred Pohl,Teresa Tortella,2017-03-02 From the late nineteenth century to the late twentieth century the European banking sector experienced countless mergers and acquisitions The outcome of this century of consolidation is strikingly similar across the continent with the banking sector of each country now dominated by a handful of giant banking corporations Consolidation and concentration trends in banking was the theme of the Academic Archive Colloquium of the European Association for Banking History held in Madrid in June 1997 This volume is comprised of the 18 papers and responses presented at the Colloquium by a truly international group of delegates Some of the themes explored in the book include the significance of mergers for bank archives the regulation of mergers and their impact on banking legislation reactions to consolidation from within and without the banking industry case studies of particular mergers and their impact on the wider banking community Youssef Cassis s introductory chapter provides a general survey of trends in the consolidation process and suggests that the advent of the Euro may herald a new era in the history of European banking consolidation
